10 High Powered Ways To Increase Your Traffic

By Steve Li

10 High Powered Ways To Increase Your Traffic by Steve Li

1. Trade links with other web sites. They should be related to the subject of your web site. Instead of trading links, you could also trade banner ads, half page ads, classified ads, etc.
2. Start an e-zine for your web site. When people read each issue they'll be reminded to revisit your web site. They'll see your product ad more than just once which will increase your orders.
3. Form an online community. It could be an online message board, e-mail discussion list or chat room. When people get involved in your community they will regularly return to communicate with others.
4. Write articles and submit them to e-zines, web sites and magazines that accept article submissions. Include your business information and web address at the end of the article.
5. Give away an electronic freebie with your ad on it. Allow your visitors to also give the freebie away. This'll increase your ad exposure and attract people to your web site at the same time.
6. Combine your products or services into one big package deal with other businesses offerings. You could share a web site and advertise the package deal; which means double the traffic.

10 High Powered Ways To Increase Your Traffic

7. Submit your freebie to the online directories that list your particular item or service for free. If you're offering a free e-zine, submit it to all the free e-zine directories on the internet.

8. Participate on message boards. Post answers to other people's questions, ask questions and post appropriate information. Include your signature file at the end of all your postings.

9. Exchange classified or sponsor ads with other

free e-zine publishers. If there is a huge subscriber difference between e-zines, one can run more ads to make up for it.

10. Post your ad on free advertising areas on the internet. You can post it on free classified ad sites, free for all links sites, newsgroups that allow ads, free yellow page directories, etc.

Used Golf Carts – Gas Powered or Electric?

By Chris Miller

Used golf carts essentially are available in two options, gas powered or electric powered. Each power option has its strengths and weaknesses on the golf course or out in the field. Feel free to use the information below to help steer you in the right direction when buying a used golf cart.

Gas powered golf carts simply run on gas. Diesel gas or standard unleaded gas powered golf carts are available. One negative aspect against the gas powered golf carts is that you might need to carry around a can of gas with you in case your engine runs out. If this were to happen, you would simply refill the golf cart with gas and then be on your way. However, if you did not have an extra can of gas with you, you might find yourself stranded where you ran out. Used golf carts that run on gas can be to your advantage. Sure running out of gas is not something you want to happen. However, it is much easier to refill and get going again if you have a spare gas can with you.

Contrary to the gas powered golf cart, the used electric golf cart has a major setback if you run out of juice. If you are driving up the fairway and find the electric golf cart no longer able to drive, you also find yourself in a major dilemma. Where in the world can you plug into to get a recharge? I'm not aware of too many golf courses that have convenience outlets placed throughout the course.

Used electric golf carts are much more environment friendly than used gas powered golf carts. Electric does not emit any pollution that you may find coming from a gas powered golf cart. An electric powered

10 High Powered Ways To Increase Your Traffic

cart also runs much quieter than a gas powered cart.

These are just a few pros and cons of buying used golf carts, either electric or gas powered. Much more information regarding used golf carts and golf carts in general can be found at
