**10 Reasons For Eye Surgery Lasik!**

**By Jerry Hall Leo**

There is no "best" method for correcting vision errors. The most appropriate correction for you depends on your eyes and your lifestyle. You should discuss you situation with your ophthalmologist or eye doctor to decide which correction will be most effective for you.

**10 Reasons for Lasik!**

1. Nothing is as sweet as the freedom from the hassles and inconveniences of contacts or glasses.
2. You save money! Over the years, the costs of lenses, solutions and glasses amounts to thousands of dollars.
3. You save time! In one year, the average contact lens wearer spends nearly 60 hours wetting, soaking, rubbing, cleaning and otherwise maintaining them. This is about 2.5 whole days!
4. Imagine waking up in the morning, and being able to see the clock!
5. You get to go swimming, scuba diving and be able to see things!
6. You are able to spontaneously go camping or stay overnight.
7. You are able to take a nap when the mood strikes without first having to remove lenses. Imagine the hassle saved!
8. You will be able to see while putting on makeup or shaving, no more squinting!
9. You will be able to participate in outdoor sports without glasses that fog or get splashed with rain or lenses that dry out in the wind.
10. And most important of all, you will be able to avoid the negative consequences of long term contact lens wear!

## 10 Reasons For Eye Surgery Lasik!

Clinicians wishing to undertake laser eye surgery should ensure that patients understand the benefits and potential risks of the procedure. So the better you understand your LASIK surgery, and what happens after your surgery, the better prepared you'll be for your surgery. Patients should be counseled on the potential risks and benefits of LASIK, then make an informed decision. No matter what your motivation may be, the decision to have eye improvement surgery is no small task and it should be considered carefully. If you decide Lasik surgery is for you, consulting your eye doctor is critical to making an informed decision.

LASIK is the most commonly performed refractive Eye Surgery procedure. Find out more about Eye Surgery&nbsp; at

### **Educate Yourself – LASIK Eye Surgery Could Be For You**

**By Nicola Kennedy**

It might be the case that you are tired of wearing glasses, or you believe that it cramps your style. You also don't want to use contact lenses, in order to avoid infection or inflammation due to overuse. In such a scenario, you are likely to consider LASIK eye surgery, which is one of the most prevalent vision correction procedures. And therefore, you require some basic LASIK education, in order to get a clear picture of what you can expect from LASIK if you want to know whether you should do eye laser surgery.

If the light rays don't focus on the retina (light-sensing cells), the image you see is blurry. This is termed as refractive error, and may be caused due to an irregularly shaped cornea. LASIK surgery involves carving of the cornea in order to give it the perfect shape, thereby making light rays focus on the retina. LASIK surgery employs a high-precision laser, named Excimer, which is an ultraviolet chemical laser.

Scads of people have undergone LASIK, and most procedures have been successful. But as with any surgery, LASIK has associated risks and complications. However, LASIK has a relatively low complication rate, between 1% and 5%, which is among the lowest in the eye surgery field. Another trivia from the chapter on LASIK education is that LASIK may not result in perfect vision. That is, not all patients achieve a 20/20 vision.

If you suffered from myopia and have undergone LASIK as a corrective procedure, you would still require reading glasses (for near vision) in your late 40s. LASIK is an irreversible procedure, and most insurance companies do not cover LASIK surgery. Therefore, make sure that your surgery is performed by an experienced ophthalmologist. Also note that only eye MDs (ophthalmologists) are permitted to perform LASIK surgery.

Now that you are aware of the ins and outs of LASIK surgery, decision making is much easier. Have a discussion with an experienced ophthalmologist. It might be the case that you could very well forego the surgery. But if need be, LASIK is a superlative option to correct your vision.
