### **Selling Ebooks On The Internet – Home Business Opportunity**

**By Greg Davidson**

By: Greg Davidson

Searching for a home business opportunity can be extremely exhausting. You have probably run across hundreds of websites claiming that they can help you make hundreds of thousands of dollars with very little effort. Or maybe you have purchased one of those get rich schemes that you saw on TV. The truth of the matter is that most of the programs do not work. The only home business opportunity that I can honestly say works is selling ebooks.

## 15 Creative Ways To Make Money With eBooks!

Selling ebooks will probably not make you a millionaire. It is, however, a great way to pull in a second income. Some people actually make enough money to sell ebooks for a living!

The ebooks I am referring to come with Master Resell Rights. If you are not familiar with that term it basically means that anyone who purchases that ebook will also have the right to sell it. This may not sound so appealing since you probably want to be one of the few selling that product. Including resell rights is actually one of the main reasons the products sell! It's a known fact that most of the world's top selling products either help make a daily task easier, or actually help you make more money. Combine them both and you have a definite winner!

Of course, all great products will eventually get old. The trick to succeeding selling ebooks is to always have the latest ones that come out. Some ebooks also come with the right for you to bundle those with others to sell as a package. This way you will still be able to make money off the old products as well as the new ones.

You will need a domain and host in order to transport your ebooks to your customers. If you don't know anything about setting up a website check out your local library and check out the search engines. It sound slightly complicated but is very easy when you get used to it.

Creating a website for you to sell ebooks from is neither expensive or time consuming. In fact, most products actually come with premade site. Simply upload that to your host and you are ready to go!

Accepting online payments is a crucial part to making money selling ebooks. One of the most popular ways of accepting payments is through a company called Paypal. They have the lowest rates and best of all, joining is Free! In order to accept online payments through Paypal you will need to have a Premier Paypal account. Make sure you sign up for that particular type of account. After that, simply create a payment link by going to Merchant Tools and then Buy Now buttons. Under Add More Options, they will ask you where you want your customers to go after you receive a successful payment. Redirect them to the area where your download links are. If the payment is not successful, redirect them back to your website.
