1ST FILIPINO VOIP SOLUTION RELEASED: Libreng Tawag Gamit Ang Internet

By Maida M. Barrientos

1ST FILIPINO VOIP SOLUTION RELEASED: Libreng Tawag Gamit Ang Internet by Maida M.

Barrientos

Union City, California (BUZZFON) July 8, 2004 – A small but emerging Filipino VoIP company, Bonusfon, answers to the clamor of the market today by launching, BuzzfonP2P, a free, compact and convenient soft phone that allow users makes clear pc to pc calls possible without the choppiness, echoes or the static noises; just crystal-clear voice even in low bandwidth environments.

VoIP?

VoIP – Voice Over Internet Protocol. It may sound alien to you now, but this is tomorrow's technology here today, VoIP is the hottest growth area and one of the most debated topic on the world wide web today!

It's major advantage is to be able to make free or low cost digital calls using the internet thereby lowering communications costs and improving relations whether for personal, business or network use.

At one time or another, you may have already tried it using free popular chat clients like Yahoo or MSN, though free, these applications does have it's disadvantages, like crackling sounds, choppiness, echoes and etc... This is where VoIP softclients or webphones comes in.

VoIP Softclients or VoIP softphones are software that runs on your computer, it converts your voice into digital formats, converts it to IP and uses the internet as medium to transfer data calls from one PC to another, worldwide. Using the latest communication protocols for transmission, Session Initiated Protocols (SIP) secure voice communications are possible and call set-up is much more precise. Using the latest in compression and decompression technologies (codec) calls are much clearer, no breaking up of voices and sometimes the quality is better than traditional telephones.

Buzzfonp2p, a beta voip solution developed by US Based Filipino company, Buzzfon will enable you to make free and crystal clear calls from your pc to another pc. Buzzfon will be releasing their pc to phone

1ST FILIPINO VOIP SOLUTION RELEASED: Libreng Tawag Gamit Ang Internet

version shortly providing the best quality international voice calls at the lowest cost. The VoIP market is presently dominated by US based broadband communications services such as net2phone, Vonage, and Yahoo.

BUZZFONP2P

You can download it for free at <http://www.buzzfon.com>. It's so easy to use, no configuration necessary, Buzzfon p2p will traverse NATs and firewalls. All you need is a headset with a microphone. Moreover, it promises to uphold the "no spyware installed" regulation. Bonusfon, a broadband VoIP service provider just launched "BuzzfonP2P " through Buzzfon.com, along side with Skype who has listed 11 million downloads and 170,000 concurrent users, Tamerlane Sanchez says "Our products and services are better than any VoIP product and service provider in the market today. " Tough words for the competition. Buzzfon says that the market is clamoring for a better VoIP softphone able to make

high quality calls even in low bandwidth environments, thus the emergence of Buzzfon.com

FROM PINOYS TO THE WORLD

Buzzfon is set to release a next generation voip solution by October 2004.

The new release will have premium features enabling users to make crystal-clear pc to pc, pc to phone, phone to pc, and phone to phone calls worldwide on the lowest rates. Rumors have been going around that users from anywhere in the world will be able to call the US for only 1 cent per minute, just hold on till you see the rest of their international calling rates.

Buzzfon is poised to redefine telephony as we know of it today, from 24x7 Customer Service, crystal-clear voice calls, premium services like Addressbook, Call Redial, Do not disturb, Speed Dial, Call Waiting, Call Mute, Call Hold, Music on Hold, Call Hunting, NAT Traversal, Stun Firewall implementation, Silence Suppression, Comfort Noise; IPBX services and probably the most exciting of all is its most aggressive pricing for international voice calls. They made it clear that one of it's biggest markets will be the Philippines, with special focus on the millions of overseas Filipino workers and their relatives.

This is indeed another mark made by Filipinos globally making the world a smaller place to live in through advanced technology.

Kaya tawag na!

Ciphering the Tagalog Language

By Ted Wiersma

Learning the Tagalog Language is essential if you plan to communicate in the Philippines. Tagalog is sometimes also called Filipino or the Pilipino Language. So as not to get confused, let me explain the difference between the terminologies. Tagalog is the national language of the Philippines. It is spoken by about 23% of the population. The remaining spoken languages, the remaining 77%, is divided among approximately 175 other dialects. Tagalog, being the Official National Language of the Philippines, is considered as the base language. If you look at the other dialects, you will see numerous Tagalog and Tagalog derivatives in them. And most who do speak these other dialects, understand some Tagalog. So learning Tagalog is essential.

That being said, you may wonder what Filipino or Pilipino is. This is a combination of both Tagalog and other dialects and languages. Filipino or sometimes Pilipino (its older name) is an amalgamation of all the Philippines languages, English and Spanish combined together. Since English as well as Tagalog is taught in the schools in the Philippines, many people tend to speak Tagalog with English words mixed in the sentence. At that point they are talking Filipino. So now you see how important it is to learn Tagalog. Once you take the time to learn some Tagalog, you will be able to communicate in Tagalog as well as Filipino. I hope this information has given you insight into the differences of the terminology which sometimes becomes confusing. Please feel free read my other articles which will help provide a crash course on the essential knowledge you need about the Philippines. Salamat !

Ted Wiersma has spent numerous years in the far reaches of Asia. Through his travels, he has experienced the language barriers most confront when trying to learn a language. "Though learning the culture of a society is important, Language is Power ! People tend to assimilate you into their society more readily if you even know only a few words and sentences." Since returning from his last overseas assignment, Ted decided to have a professionally produced, more essential , and fast learning language system developed. One which could be used also for Sleep Learning and provide quick everyday communications. To view more:
