3 Card Poker Strategy

By Adel Awwad

When you break out the 52-card deck and deal a hand of 3-card poker, the first strategy you need

is a firm understanding of the rules. Rather than competing against other players, you are competing against the dealer. You need a better hand than the dealer (and at least a pair) to win. Each of you is dealt three cards, and the cards are shuffled after each hand. Because there are fewer ways to make a straight with 3 cards than a flush, straights rank higher. Aces are high or low.

You can make two bets: the Ante and the Pair Plus. The Ante is the fee charged to you for playing the hand. The Pair Plus is your bet that you will get a hand with a pair or higher. You don't have to make both bets, but you do at least have to bet the Ante to stay in the game.

You ante when you put your bet on the game table's Ante spot. Both you and the dealer are dealt three cards face down. Your next decision? Are these cards good enough for you to bet or should you fold? Fold and lose the ante. Bet and you place your bet that equals the ante in the game table's Play spot. Win and you get the Ante and the Pair Plus payouts. The dealer has to have a Queen or better to stay in the game. If not, you get payment on their ante only if it pays even money (1 to 1) - and as long as you didn't fold. Ante Payout

– A straight gets a 1 to 1 payout. – A three of a kind gets a 4 to 1 payout. – A straight flush gets a 5 to 1 payout.

Pair Plus Payout

– A pair gets a 1 to 1 payout. – A flush gets a 4 to 1 payout. – A straight gets a 6 to 1 payout. – A three of a kind gets a 30 to 1 payout. – A straight flush gets a 40 to 1 payout.

Remember these tips to help your strategy:

– If you have a Queen or better, bet the Pair Plus. If not, fold. – A dealer will get a Queen about 66% of the time. – The house has a 3.4% advantage.

The History Of Let It Ride Poker

By Adel Awwad

Of all the card games being played today, it is undeniable that Poker is one of the most popular, as well as being one of the most famous. People get attracted to the sheer excitement of the game, the thrill of putting one over another player and of course, the big winnings that go along with it.

Because of its popularity, Poker has been adapted into a number of versions and has been regarded as an international card game. It has since evolved from being a simple household or neighborhood game into a professional, high-stakes competition that attracts aficionados from all over the world.

One of the Poker variations that has evolved and has garnered strong following is Let Them Ride Poker. The game, which is loosely based on the popular card game, was developed by the Shuffle Master Gaming Company. The purpose was to increase the sales of their automatic shuffling machines to land-based casinos. It first debuted in Reno, Nevada in 1993.

Let It Ride Poker is based on the Five-Card Stud Poker Game, which gives casino guests the chance to control two out of three bets wagered on an actual Poker game. Players have the option to pull out their bets if they don't like the way their hand develops or "let it ride", as the name of the game indicates, if they want to proceed. Let It Ride Poker is comparable to games like Video Poker, Pai Gow Poker and Caribbean Stud Poker, which are new breeds of games based on the classic game of Poker. However, unlike the usual game, Let It Ride Poker is a single-player game, in the sense that the player competes against the machine and not the banker or other Poker players.

To date, Let It Ride Poker has flourished to become a very interesting and competitive game with a strong following. And why not, when it is patterned after one of the most successful card games of all time?

The game tests a player's intellect and strategy. While luck can win the player a round or two, it is no match to wits and a sheer knack for the game. Let It Ride Poker is a thinking game - each move should be well thought-out before it is enacted. Otherwise, it could make or break the whole game. This is the goal of Let It Ride Poker - to add spice and sizzle to an already electrifying game.
