A Gambling System That Works

By Adel Awwad

Since gambling began, there have been people who have strived to find the perfect gambling system – one that puts the odds so much in the gambler's favor that riches are almost certainly guaranteed. In all these thousands of years, has anyone ever really found a gambling system that works?

Although there are people who claim to have found systems to beat the odds at any type of gambling, most of the gambling systems that you hear of are for a particular form of gambling; such as Blackjack, Poker, or Roulette. There are many books about systems for particular areas of gambling, most written by people who have focused a lot of time and energy on their choice of game. There is no arguing that there are people out there who win more at certain games than they lose; just look at the professional Poker players you see on TV these days who live quite comfortably on their winnings. Many of these professionals have written books on how to win at Poker, and more than likely their advice is sound and potentially profitable.

For the serious gambler, the best thing to do is to choose one game – two at the most – and do as much research as possible. Practicing the game helps, but you may not be the kind of person who can come up with winning strategies easily. More often than not a great deal of math is involved, and for some people math just isn't their strong suit. It's best to find systems that have already been established by successful gamblers, and see if they work for you. Systems differ with whomever invented them, and it may be worth the time to try several different systems before you decide on which one works best for you. Keep your wagers small until you feel comfortable that a certain system is going to work well for you.

Although systems do exist that can put odds more in the gambler's favor, one must never forget that gambling means taking risks, and these risks can never really be completely omitted. Sinking your life savings into a gambling system that you believe is foolproof and will put you on the road to riches is a foolish idea, and any reputable professional gambler, no matter how successful, will agree with that. That being said, it certainly doesn't hurt to test gambling systems by starting with small amounts of money that you can comfortably afford to lose, and seeing which system works best for you. If you win, gamble with your winnings, and set aside the amount that you started with. That advice, by far, is

probably the gambling system that will always work best.

Online Gambling – Keep Control

By Adel Awwad

Gambling can be addictive no matter where you are doing it – at a land casino, playing the lottery or at an online casino. Sometimes it is easier to get carried away at an online casino than at a regular land casino because you aren't actually handling money or chips, your money is all digitally displayed. Further, money can go fast when you are having fun.

As it is with all gambling, it is important to keep control when you are gambling at an online casino. By keeping track of your credits and cash and setting yourself honest limits that you adhere to, online gambling won't be a problem for you. Further, by setting limits on yourself for how much money you are willing to gamble and lose, you can keep control of your online gambling habits and make it a fun experience as it was meant to be. Gambling can be a lot of fun, a real adrenaline rush—especially when you are winning. There is an adrenaline rush when you are losing too, and that's when online gambling can get out of control and before you know it, you've spent much too much money, much more than you intended to gamble away. There are other precautions you can also take such as watching your drinking, not playing when you are tired and setting a time limit on each gambling session.

If you think you have a gambling problem, then please contact your local gambler's anonymous help group and get some help. It is so important not to let gambling run or ruin your life. "Just one more twenty/hundred/thousand dollars" is never something you should say more than you can afford to. Watch and keep track of what you are doing, how much money you are inputting into an online casino and keep the game and gambling experience fun for you and everyone.
