**A Look At The Sleek Motorola RAZR Wireless Phone**

**By A. Pruder**

The Motorola RAZR is a sleek, portable telephone that measures 13.9mm thick and features the width of a standard credit card. According to Motorola, "it is one of the slimmest phones on the market yet still rich in functions, performance, excellence and design innovation."

It may be difficult to believe that so much technology can be packed into such a compact design, but don't let the package fool you on this one – it has plenty under the hood, so to speak. In addition to a sleek, eye catching design, the Motorola RAZR model offers the owner an ability to capture high quality images as the phone features a built-in digital camera with impressive zoom capability and that quickness to snap that special photo in a hurry. In addition, the Motorola RAZR carries the capability of providing MP3 ringtones. With the popularity of MP3 files steadily growing, many cell phone users are eager to incorporate their favorite music into their telephone, which is exactly what Motorola has created with it's new ringtone feature.

There are several models of Motorola RAZR, including the standard V3, the V3i and the recent addition of the V3c model. The latter is an upgraded model that was released in late 2005 and became widely available in early 2006. With each new addition to the Motorola V3 line, consumers are introduced to a new line of features and product choices.

Some of the most popular features found on the Motorola RAZR are caller ID, sleek external design, specialty made keypad featuring nickel-plated and copper-alloy components, easily visible display, keypad illumination, internal antenna and Bluetooth wireless technology. Some models also feature a colorful external display. While the conservative individual may prefer the standard silver design, others may find the vibrant pink or blue color to be a whimsical idea. The latest colorations are being made available in early 2006 as a result of their recent release.

The convenience of a wireless phone is unmistakable, as is their popularity. These days, everyone has a cellular phone as it helps to keep friends, family and colleagues in constant communication with one another. Some use cell phones for fun, others for business and many for peace of mind. Whatever the reason, every consumer enjoys knowing that their phone is reliable, full of features and is backed by an industry leading telephone manufacturer.

## A Look At The Sleek Motorola RAZR Wireless Phone

The Motorola RAZR telephone is available at local Motorola retailers. For more information, please consult the nearest representative or shop online for the latest innovations from Motorola.

### **The Cell Phone To Be Seen With**

**By Ted Belfour**

There is little doubt that Motorola's Razr cell phone is the ultimate fashion accessory. A member of what is termed by those in the know as the camera clamshell phones, the Razr is only half an inch thick, making it one of the most totable phones around. No wonder it was included in the exclusive gift bags given to the crème de la crème of celebrity icons at the 77th Academy Awards.

But fashion is a notoriously fickle thing, given to the most capricious of whims, and the cell phones currently deemed by those in high places to be in vogue are no exception to this steadfast rule. Upon its first release, the Razr cell phone was marketed, and priced, as an exclusive item, but as with most other high fashion pieces, its fascination has diminished over time. There is little doubt that the slender silhouette of the Razr makes it extremely easy to carry around, but as time has told so many times before, practicality has no place in determining what is deemed to be of the moment.

And yet, it is not high fashion that keeps the world turning, at least not entirely. In a world where money is the root of pretty much everything, a Razr cell phone that has fallen in price to reach the budgetary limits of the vast majority of cell phone users is going to be a popular thing. The rest of the world might lag behind high fashion, but to the humble masses, the Motorola Razr cell phone is still cool.

Available in a range of colors, and with that slender signature look, there's little enough that makes it un-cool. Black, silver, blue and pink tones make this a phone that will stand out. And for those with social consciences, the Razr is a phone that cares - a portion of the proceeds from the pink variety will find their way toward the important pockets of breast cancer charities.

So while the Razr was not the cell phone of choice at this year's Oscar celebrations, this slender cell phone remains an object of lust for many. And rightly so - with its sleek lines and cool wide screen, the Razr is likely to be a popular choice in the cell phone market for several seasons to come.
