A Variation In Travel Luggage: Past To Present

By Cathy Peterson

Whether you are traveling across the country, or you are only going on an overnight stay, you will

most likely bring along some kind of traveling luggage. What a person travels `with' is one of the most important parts of every traveler. Travel luggage is designed for all kinds of travelers such as, sportsmen, men, women, kids or even animals have essentials to carry in their bags. In the early 20th century many the ladies carried their night kits and men carried large trunks fit for the military. Today there are a plethora of models that can be purchased in a variety of sizes shapes and colors.

There has been a need to take items while traveling. From ancient time, the trunk was the most popular form of luggage. In those days there were trunks made from animals such as horses and cows. The materials used to make trunks made them sturdy. Although trunks are still being manufactured, they have been replaced with suitcases.

· There are several types of luggage, including: leather briefcases, computer cases, carry bags, garment bags, garment carriers, kids luggage, totes, backpacks, duffel bags, motorcycle luggage and handbags. You can find the perfect luggage to travel with, cosmetic totes, computer cases and handbags are designed to make a traveler's experience easier. Each item is available in a variety of styles, sizes, colors and materials. Where ever you are going to spend a week, putting your items into a suitcase or other form of luggage will give you peace of mind.

· Suit cases are made of a variety of materials: wheels, zipped inside pockets, water resistance, lock and even extra storage space. The Internet is filled with discounts on various luggage sets. Luggage is made by a number of manufacturers, including: Ace, Ameribag, Briggs & Riley, Hartmann, Samsonite, Travelpro, Tumi and Olympia just to name a few. Incorporating ideas from the past and adding today's technology will offer travelers a chance to travel a lot easier and a lot more organized. The next time you need to travel, thank your ancestors for passing down such a practical, important product! Wide variety of materials, including: leather, suede, denim, nylon and even metal are used for luggage, these materials vary in purpose and benefits; you can even score some luggage that is waterproof.

There are numerous ways to find discounts on luggage, especially on the Internet. To find out further information on luggage log onto:

How To Buy Luggage Online

By David Sanders

Traveling can be an exhilarating experience especially if you have the proper luggage to carry around. Most travelers prefer the maxim less is more when it comes to luggage. However, there are people who cannot travel without bringing an entire wardrobe.

No matter how heavy or how light you travel, it is always advisable to get the right luggage for your lifestyle. A businessman should opt for a more business like luggage while a backpacker should choose a more practical luggage. On the other hand, a socialite should travel using only the trendiest luggage in tow.

Getting the right luggage is no longer a problem nowadays because there are various shops offering a complete list of luggage online. People who are interested in buying the luggage can choose from the online catalogues and order them by filling up the required forms.

No matter what your lifestyle is or what kind of traveler you are, it is always best to choose luggage that is functional and aesthetic at the same time. The primary consideration should however be the functionality and practicality of the luggage.

Choosing a luggage made of lightweight material will always be a good choice especially when traveling by air. Airlines charge extra for luggage that weighs beyond the allowed weight limit. A baggage that is already made of heavy materials to start with can cost the traveler a lot of money in excess luggage fees alone.

Seasoned travelers know that a good luggage should have useful compartments for different items like shoes and accessories. The majority will however agree that a luggage equipped with small wheels will always be practical especially when it has to be hand carried.

The durability of the luggage should also be a consideration because no traveler would want his belongings exposed to the whole world when his luggage gets damaged even before going inside the airport.

Some people will opt for luggage that can be adjusted in size and length depending on their load. The more fashionable travelers will prefer matching luggage that is easily identifiable. When choosing the size of your luggage, always consider the different airline rules as to the sizes allowed to be hand carried and those required to be checked in.

Of course, luggage made of good quality will always cost more than the lesser quality luggage. However, sacrificing a few dollars for quality may be the best option rather than choosing a cheap luggage that will not stand the test of time and travel. Usually, highly-priced luggage will be more cost effective in the long run especially when its owner will have some heavy traveling to do in the days to

come.
