Advance Token to GO—Choosing the Right Token

By Kosta Kasso

Advance Token to GO—Choosing the Right Token by Kosta Kasso

"Importance of Choosing the Right Token"

I always choose the Dog or the Car... which do you choose?

If you realized the importance of "Studying the Market" and "Learning the Lingo" before choosing every affiliate and Downline Plan out there...

Well, That's great. You're already ahead of the Game.

But if you're even the slightest bit gullible, like most of us are, I'm guessing you didn't. So, how many programs did you join? I'm proud to say that I personally joined about 20! Lucky for me, when I started I was flat broke and couldn't afford to "upgrade". Otherwise I'd be a Pro member of 20 useless programs!

Here's a tool you might already have, if not, it install it and follow me...

Download Alexa Toolbar

It's called the Alexa toolbar. It's a rating system for websites. I won't get into the details of how it calculates ratings. You can do that later, and it will help you to understand.

Suffice it to say, it is similar to a Credit Rating. That's how I describe it.

Once installed, go to your e–mail inbox and pick one of those great sites titled "1,000,000 hits in Three Days Guaranteed!!!"

Click on the link and check it out. If the site has an "Alexa Rating" of 1,340,456 for example, I doubt they know very much about traffic Generation! I wish I knew this three months ago!

Some of the sites I joined, unknowingly, promising me huge traffic, perpetual downlines and more spillover than I could suck up with a WetVac, had Alexa Ratings of over 500,000. No wonder I wasn't making any money. Of course this is simply a tool to help you choose. Some sites may have great ratings and still be terrible.

Advance Token to GO—Choosing the Right Token

Read the reviews. Maybe you joined some programs because they sounded so great, you thought to yourself " What if it's true?".

I've gotta at least try it. If and when it doesn't work out, you don't blame the system, it's a "Proven System" with "Testimonials" instead you blame yourself.

If , in the Offline World, you had 20 jobs and you put in 2 hours a week per job, do you think you would excell in any one, or better yet, all of them? Even if one of them was a great company? Unlikely...

You now have one more tool in your Shed of Wisdom to use. Learn how to use it. There are many more and I suggest you find them and use them. Make your own decision whether or not a company can serve your purpose. Don't believe the Hype. Investigate and then choose.

Any company claiming to do Everything cannot possibly do any one thing exceptionally.

Choose one company that has a good reputation for Hosting, Tracking and Building a website. Choose one or two companies known for their Quality submitting and lead generating ability. Choose another for it's Autresponding and list building prowess. Put the power of these four or five companies complimenting each other together, and you have a well oiled Money Making Machine!

Once you get comfortable driving this beauty, then you can start confidently re—investing and perpetually increasing your income.

I choose the Car or the Dog. Sometimes I put the dog in the car!

Now, which do you choose...

Laptop Computer Extras for the Mobile Traveler

By John San Filippo

A laptop computer certainly provides you with an unprecedented level of freedom and mobility away from the office. However there are a few extras you might want to bring along on your laptop travels:

Extra 1: portable printer

If you travel a lot, you never know when you might need to commit one of your digital documents to paper.

Sure, you can probably find a Kinko's, or even the business center at your hotel, but the experienced business traveler knows you're much better off when you're not at someone else's mercy.

Extra 2: USB hub

If you need to connect to several external devices simultaneously, the one or two USB ports on your

laptop may or may not be sufficient. If not, keep an inexpensive four– port USB hub in your laptop case.

Extra 3: PC card token ring adapter

Ethernet is the industry standard for computer networking, however back in the 1970s IBM introduced a competing technology called Token Ring.

While Token Ring has all but faded from the mainstream, some hardcore IBM'ers still use it.

If you're going to be working in such an environment, you'll need a PC Card to connect to the network.

Extra 4: Foreign power kit

If you travel abroad, you're bound to run into a wide variety of power schemes – power schemes that aren't compatible with your laptop.

When you're away from the homeland, you'll need some sort of adapter/converter if you want to plug into a local wall outlet.

These are relatively inexpensive and can be easily found online.
