**Affordable Degrees - How To Study Without Going Broke**

**By Nelson Widrow**

I'm telling you affordable degrees are the wave of the future. Do you remember how when all your

drone friends were slaving away at their universities with less money than the guy that sleeps in your hedges? Meanwhile, you laughed all the way to the bank every week with the sweet check you collected from the carwash? Well, its been awhile, since you've felt that sort of ability to condescend, but not for long. Lie to your friends and tell them that you're going to your grandmas for week...and then return with a PhD!

That's right, someone finally got higher education right. Instead of learning things...and paying someone to do it, you can just tell them what you've learned and then collect the appropriate degree. It's genius and affordable. This exciting program also will only sideline you for five days. I know it's a week and that's pretty irritating, but depending on your current level of knowledge you can walk away from that week with an associate, bachelor, masters or even a PhD.

The only problematic aspect that I can see in the beautiful concept is that you need to know things in order to actually get your affordable degree in five days. I mean, I know a couple things. But Master's Degree sufficient worth of things, that I can't be completely sure of? I don't want to just settle for a lousy Bachelor's Degree. I need to go big. On second thought, these programs seem to be run by fairly reasonable people. I bet that if I promised them that I would learn enough things later they would accept that and give me the degree.

Well, I don't know why I'm still here writing. I just wasted a fifth of the time its going to take me to graduate. So, if you want an affordable degree that could have you working in the United Nations in a week, get out there and start explaining to someone what you know.

## **Engineering Degrees Online - Becoming a Pro From Home**

**By Nelson Widrow**

So, your hectic schedule prevents you from spending all day on campus and streaking through the quad during the night. Well, that's unfortunate, however it certainly doesn't have to preclude you from following your dream of beginning or continuing your engineering education and career. Nowadays, the unbelievable plethora of online engineering degrees available, for every level of study, there's a perfect fit to meet anyone's demands.

If your experience and history has gone as far as graduating high school, or even attaining your GED, starting off with an associate degree. You can still specialize in whichever forms of engineering matches your interests and abilities. With the online engineering degree, there's: civil, electrical, mechanical, environmental engineering and more. You're able to gain the know-how and practical experience that you need to get started working in your field. And the rigidity of the schedule is up to you. If you absolutely overwhelmed at your job, take longer. If you feel like you can handle a bigger load of class credits, take on what you can. With online courses, you make the schedule. You can study online or with books at your convenience, a combination of the two, anything but come in to the classroom when it doesn't fit into your schedule.

But online engineering degrees certainly don't stop with associate degrees, your undergrad and graduate degrees are within your reach if that's the level of education that you are ready to start, that's fine. Just imagine, not having an interruption in your work and being able to present a potential employer with your masters degree in just a couple years. The future is up to, as is the university schedule, when you utilize the benefits of online engineering degrees.
