Are You Addicted To Your Video Game?

By Taisha Grant

Once a person plays a video game, chances are they will like and enjoy the game and continue to play until a new game comes into the arena. Many game players have stacks filled with video games. Many people have so much merchandise that if they were to open a game store, they wouldn't have to worry about purchasing video games right away. Many video game players trade video games with friends, family and even strangers.

Several adults have become completely hooked on today's video games. Many state that it is not an addiction, it is simple a way for them to relax. One begins to wonder how they can possibly relax when they move around, jump and shot at the screen with their wireless controllers. Many parents are concerned about their children playing video games religiously...during the summer time, when school is out, many play three times a day.

There are several ways to determine if video game playing is an addiction or just a fun harmless hobby. Many have claimed that they can stop at anytime. Here are a few points to determine if you are a video game-aholic

-If you own 50 or more video games. You become possessive if one of your family members moves your games. So you place a small sign on top of your game equipment.

-If it was up to you, you would play video games day in and day out.

-You trade video games more than once a week. You trade games more than a stockbroker trades stocks from the Stock Exchange.

-When you are playing a game you want to constantly win all the time.

-If there were a fire within your home and the only exit is a window from a 22nd floor apartment. The only way to escape is to slide down a rope onto a helicopter. Instead of helping others out as well as yourself, you neatly wrap a clothe around your vide collection and you send it off to safety.

Role-playing games have become very popular among video game players. Video game players can assume another character roll involved in the story within a game. Not too long ago games were played using multi-sided dice. These role-playing games should not be taken seriously. If you are searching for a website that sells video equipment Video Games Box has what you need.

Video Games From Cheats And Tricks To Reviews

By Chris Elliott

As you probably know that nobody likes a cheater. However, when discovering video game cheats, "cheating" isn't what you're doing, but "discovering shortcuts, tips and tricks," or video game hints.

Video games are usually incredibly complex, since the days of Pong and PacMan, that the game authors have actually hidden some back doors and other shortcuts to help the weary player. The problem is, most of the back doors are well hidden that the same authors have to leak the game cheats or nobody would ever find a back door.

And it's not only the blood and guts video games that provide cheats to the game player. Take the perfectly bloodless "Finding Nemo" for the GameBoy Advanced. Who'd ever guess that there are at least six video game cheat codes hidden there?

Don't make a mistake, thinking that it's just the handhelds. If you play a video game online, for instance, Xbox Live, there is a whole set of video game hints available.

Of course, video game cheat codes and game hints could become useless if you don't have a video game. And that's why video games have become available on the website.

Any web sites that are worth visiting will not only content video game reviews and cheats for you. but they will also provide you with game walkthroughs. Video game walkthroughs are different from cheats in the sense that they actually "walk you through" the process of achieving some goals. Video game cheats, in contrast , are often cryptic one or two liners like "Enter xx312 in the password field."

There are different kinds of video game reviews. Each has good and bad points. Professional video

game reviews are usually written by paid reviewers who work for video game magazines. These reviews are well-written, in depth, and definitely worth reading. The other most common writer for video game reviews are the actual end users. While an end user will normally have spent a lot more time playing the various video games on the most popular video game systems, you'll often discover that they are men and women of little words. It's not uncommon to find a review that says "Wow! Kick Bu** man. I love it!" Now, that's probably simply saying quite a bit about a particular video game, but — your mileage could be various.

The key thing to be remembered is that you will not invest in a video game if there are only a few people who write a review of the game. Certainly, if everyone believes this advice, there would be no video game reviews on the internet, because everyone would be waiting for others to write a review for them.

There are also game previews. A video game preview is a lot similar to a movie trailer. They include all of the really exciting parts together and provide you a rapid and furious glimpse wishing that you'll believe that the entire video game is actually as cool as the 90 seconds of video game previews that they let you get a peek at.

The video game industry is at a crossroads. The more people play game online switch, the more the video game systems like XBox Live and all of the XBox video games are out there, it could be

predicted that the days of jamming your joystick alone in your room are slated to become "back in the day." And as there are more video game systems opt for Internet connectivity, you intends to find that you will never have to play video games alone again.
