**Blackjack for beginners**

**By Michelle Jonson**

Blackjack is the most played casino card game in the world today. Blackjack is one of the very few unbeatable casino games, meaning that if you know the rules and have a basic understanding of strategy than you can come out in the black, so to speak, over the house.

The edge over the house can only be achieved if a player knows the rules and the strategy of the game.

The rules are simple; the main purpose is to have a hand closer to 21 than the dealer, without going over. The strategy involves knowing the odds. Knowing whether to hit or get more cards or stand stay with your current hand at 17 is where strategy starts to come in.

There are amazing tools online today for a beginning player to learn the game. HitorStand.net (

<http://www.hitorstand.net/>

) offers an interactive blackjack tutorial that teaches the game as you play.

This is a must for the novices.

You can the upgrade to sites like Online-Casino.com (

<http://www.online-casino.com>

) that have free

blackjack games versions. Try finding a site like this that has a no-download, completely free game version that you don't have to register for.

After you feel completely comfortable with the game and you decide whether you would want to play online for real money.

## Blackjack for beginners

Playing for practice, or free money, online is a great advantage for blackjack beginners today. Blackjack is one of those games where the rules are easy to learn but the strategy takes time to master. It is possible, though. Today, with the free versions online, all a person needs is perseverance and an Internet connection.

The basic objective in the game of blackjack is to get the highest hand value to 21 points without going over. When learning the rules, the main factor a player needs to learn is how much each card is worth. Afterward, with the strategy, a player will need to remember the odds and statistics of the cards.

The great thing about a blackjack strategy is that the more tips you learn, the better your game will get. Knowing a few tips can dramatically increase your game.

The best advice for beginners is to find a site with a free version and start playing. The strategy will come with time. Once you know that you should never play with a casino that uses more than 6 decks at a time and to never, ever, take insurance, you're well on your way to becoming a blackjack pro.

### **How To Play Blackjack**

**By Adel Awwad**

Whether you call it Pontoon, 21, or an investment. Blackjack is easy to learn and even easier to play. The aim of Blackjack is to accumulate a winning hand of 21, or as close to 21, without going over (bust.) That's all there is to it. No flushes, straights or trying to outsmart the other players, who, like you, are all just trying to beat the Blackjack dealer.

Despite its simplicity (Blackjack is truly accessible to all); some players inevitably try to complicate Blackjack. For all the talk of systems and odds, all you need to know is how to win and how to avoid losing! Here's how it works: Two cards are dealt to every player and play moves from the dealers left - each participant elects whether to hit (take another card,) stand (play with the cards they were dealt,) or surrender, in which case they fold at the cost of half their original bet. Once all the participants have finished hitting, the dealer plays his hand and pays out to players who beat his score.

The good news is: Blackjack dealers are bound by the house rules; you're not. For example, dealers stand on all 17's. In other words, he'll keep hitting until he reaches or exceeds 17. If he draws a king and a six, he's bound by convention to play on, while you've got the get-out clause of an early surrender.

The better news is: you can 'Double Down' and double your winnings! Double your bet on a potentially winning deal, provided you can hit once and stand. You can even 'Split Your Pairs' and double your chances! If you're dealt two cards of identical value, split them and play two hands for the price of one!

The best news is: in Blackjack, you can win big and win quickly. Blackjack is the name and the aim of

## Blackjack for beginners

the game. A Blackjack is a total of 21 in your initial deal; a picture card / ace combination. A blackjack can only be beaten by a dealer's blackjack. Any other score of 21 just won't cut it.

Blackjack is a truly elegant game: uncomplicated enough to engage players, but sufficiently captivating to keep them coming back – once you start playing Blackjack, you might just find you can't stop. Blackjack is enjoyable, exhilarating, and instantly compelling. No wonder it's played and enjoyed the whole world over.
