## **Bose Home Theater Speakers**

**By Hyun Kim**

### About Bose Corporation

Based in Framingham, Massachusetts, Bose was founded by Dr Amar G Bose in 1964. Bose Corporation is an American specialist in high-end audio systems. Bose is world's leading manufacturer in home theater speakers and professional audio market. It manufactures variety of model for home theater system including its own patented Wave radio system. The founder of Bose Dr Amar G Bose was an electrical engineering professor at Massachusetts Institute of Technology in Cambridge.

The brand name Bose has strong marketplace. In US alone Bose is the highest regarded brand name amongst US population than any other brand name. Top-notch product lines of Bose are Speakers, amplifiers, and just recently acoustic headphones and last but not the least high-end digital technology speakers. For musician Bose offers amplifiers and loudspeakers.

### Bose Lifestyle 48 home theater system

Bose Lifestyle 48 home theater system comprises five satellite speakers, one subwoofer or Acoustimass, one disk player and a remote control. Disk player can play compact disk, DVD, MP3, Writable CD, Rewritable CD etc with full DTS, Dolby digital compatibility. Bose acoustimass has power amplifier plus subwoofer for enhancing deep bass. Lifestyle home system has ability to adjust itself according to living room acoustics. The Bose lifestyle 48 system has many other input outputs, which can create composite output from all the inputs to create lively experience from all corner of the home.

### Positioning of Bose home theater speakers system

The positioning of speakers is most important in creating home theater system. First look at the front speakers. Ideally all front speakers should be in horizontally line throughout in the middle of the image. But this is not possible in most of today's home theater speakers system. To get most realistic sound experience speakers should be arrange in such a manner that they create the sound at par with source on the image. Placement should be above the ear level. In modern patented systems like Dolby Prologic or Dolby digital there are many other things, which needs to be done including software installation, tuning of the entire component. For better results manual should be referred to avoid any

### **Bose Wave Radio**

**By Ratliff J**

#### **Bose Wave Radio by Ratliff J**

You may know Bose from all the radio ads. I listened for years before I finally decided to buy the Bose Wave Radio / CD. I have to admit I was skeptical of spending \$499 for a stereo system. I eventually had the opportunity to listen to one at a friend's house. I was amazed at the sound this little box created.

Well, I bought one, and I am glad to say it is well worth the purchase. Bose now also offers financing, so that makes buying one even easier. They offer a money back guarantee, so you really have nothing to lose.

I highly recommend you try one, and hear it for yourself. I think you will that the Bose Wave Radio will sound better than you could have imagined.
