## **Burial Vault Pre-Planning**

**By Robert Shawn**

### **Burial Vault Pre-Planning by Robert Shawn**

The Burial Vault is an Important Part of Funeral Pre-Planning.

You hear a lot about caskets also called "coffins" and about how much protection they provide your loved one after burial. You never really stop to think about what actually is the most important part of the burial - the burial vault or grave liner.

Consider this. The casket is generally made out of wood, steel, fiberglass or plastic and in most cases the only protection against rust or water penetration is found in the gasket or seal. So, for protection considerations, wouldn't it make more sense to concentrate on the outer container itself since it has to provide the maximum protection possible?

Burial vaults or grave liners are protective outer containers for the casket and were developed as a means to prevent the ground from sinking as the casket deteriorates. For this reason, most cemeteries today require vaults or liners for the casket to be placed in upon burial.

Concrete vaults, which are made with a reinforced concrete, have been used for decades. Since their inception, there have been several additions to the process including using a plastic liner. The plastic lined vault has provided the longest lasting protection against the elements up until now.

With today's advancements in technology, it is now possible to produce a burial vault totally made of plastic that can provide better protection than what is seen in a concrete vault at a much lower cost. This is welcome news for cemeteries and funeral homes that will no longer need the heavy equipment used to handle the concrete vault to manage the lighter weight plastic vault.

Everest Burial Products has developed a burial vault made of polyethylene using a rotational molding technique to consistently ensure uniformity and has a unique style unlike no other vault on the market. Called the Great Spirit II, the burial vault does not require any particular attachments or tools and has an approximate weight of 88lbs.

When a loved one dies, costly decisions are often made quickly. For this reason, pre-arrangements should be considered to prevent having to make these decisions under emotional stress. Keep copies of your plans and store them in a place where they can be readily accessed when the need arises.

If you would like more information on the Great Spirit Burial Vault the website <http://www.eburialvault.com> or visit the funeral directory <http://www.eburialproducts.com>

### **Affiliate Cash Vault – Can You Really Make Money Within 15 Minutes From Now?**

**By Joey Merrick**

This is a relatively new course by Patrick Lanoux that boasts a 100% automated system that can start earning you money within 15 minutes. These are some pretty hefty claims so let's see how The Affiliate Cash Vault stacks up...

After signing up for The Affiliate Cash Vault you will get access to a members only site where you can download the course and some tools and tutorials. Of these you will get a list of the highest paying keywords and the secret to cashing in on them, a detailed tutorial on pay per click advertising, very effective low cost advertising, and more.

And you will learn how all of this can be done without a website of your own. Of course if you do have a website you will also be given a pre designed webpage template that is designed to pull in profit, and you will be shown how to make your webpage rich with relevant content without having to do a thing yourself.

Patrick goes into great detail about everything including what accounts you will need to sign up for, how to set them up, how to find profitable niches, and how to generate huge lists of profitable keywords. Screenshots are included along the way and Patrick also gives you his personal e-mail address so that he can help you if you get stuck.

We do have some minor gripes about The Affiliate Cash Vault. First of all the sales page makes everything sound easier than it really is. We didn't make money within 15 minutes and we seriously doubt you will either.

Second, the course goes into incredible detail about the simplest things like setting up a basic Adwords and Adsense account. It would be like the owners manual of a new computer writing a whole chapter on how to plug the computer in and turn it on.

The Affiliate Cash Vault is cheaper than most of the competition though, and contains some killer

techniques that we found in other ebooks costing more than twice the price of The Affiliate Cash Vault. One technique in this ebook alone will pay for itself many times over. While making money with this may not be quite as simple as the author has you believe, it certainly is possible within a day or two.

\* This article may be distributed with the authors resource box intact.

Joey Merrick is the webmaster of

where you will find

comprehensive reviews on several of todays hottest income opportunities and money making ebooks.
