CANCER – Could a strong immune system be the missing link?

By Dan Clizer

CANCER – Could a strong immune system be the missing link? by Dan Clizer

Could a strong immune system be the missing link?

With billions and billions of dollars going into cancer research, wouldn't you think there should be very promising cancer cures available by now? Well...a good case could be made that the billions of dollars that have been poured into cancer research have been focusing on all the wrong areas. The reason, I believe, that the research has focused on the wrong areas are not an accident. I believe the reason is simple: BIG MONEY! Consider how this research through the years has primarily focused on developing new drugs for treatment of cancer but not in prevention. There are obscene amounts of money at stake in the race to develop new drugs whereas there is very little money for profit while preventing cancer in the first place. A healthy patient is a customer lost.

I realize what seems unlikely or maybe even unthinkable to most, is the idea that money could be more important than human life. But along with this sobering news, there is also some really good information about cancer treatment and prevention that hasn't exactly been "in the news". If you do just a little bit of research into cancer research BEFORE we get into the great news, I think you might agree that there is something very FISHY going on in cancer research. For a short eye-opening article, click here: [HTTP://www.eurosolve.com/charity/bava/cancer.html](http://www.eurosolve.com/charity/bava/cancer.html)

While this article is very disheartening, there is good news. Some very conclusive research has proved that our OWN body's immune system is the real key to beating cancer! How? It seems that if our immune system is working at full strength, it AUTOMATICALLY provides all the necessary killer cells to fight off cancer.

A NEW WAY TO BEAT CANCER

In spite of what you may have been told, there are some new and very effective ways to beat cancer. Here is an example:

CANCER – Could a strong immune system be the missing link?

In 1993 a four step treatment protocol using "microcurrents" was developed and then tested on cancer and AIDS patients over the next two years. This treatment plan proved to be nearly 100% effective against not only cancer and AIDS, but also many other diseases as well. This treatment protocol was effective at killing ANY type of disease caused by a virus, bacteria, or fungi. The researchers were absolutely astonished to find the treatment was so effective with a HUGE array of different diseases including;

cancer, HIV, epstein–barre, hepatitis, chronic fatigue, meningitis, tuberculosis, just to name a few. The real strength of this treatment is that it completely restores the body's immune system, allowing it to finally work as it was designed.

A good example of this is with cancer. Any oncologist will agree that a properly functioning immune

system will eliminate cancer cells from the body. With the immune system at full strength, the body will produce INTERFERON and INTERLEUKIN which easily takes care of the malignant cells.

Another really good example of how much difference a healthy immune system makes is with AIDS. As you may already know, people with AIDS don't die from the virus, they die from some other type of infection the the immune system couldn't fight off. They lose their lives simply because their immune system wasn't functioning properly.

The researchers testing this microcurrent technology found it was extremely powerful because of two direct effects on the body. First the microcurrents completely disabled or destroyed all harmful pathogens in the body (including all viruses, bacteria, and fungi) at the same time, leaving beneficial enzymes, bacteria, etc. intact and healthy. Second : the long term benefits were a completely restored immune system. When all the viruses, bacteria, fungi, and other parasites were cleared from the patient's bodies, their immune systems magically started to function at full strength again.

The best part of the story is that nine years ago, a treatment protocol was developed that was safe, inexpensive, and effective at treating cancer (and for that matter, most other diseases). This treatment IS a reality NOW! Not in the future but NOW! You can do the research yourself and prove this. Not only is this protocol safe and effective, it can also be used to easily treat yourself in the privacy of your own home!

Are you finding this hard to believe? That is the real crux of the problem. For over one hundred years, generation after generation, has been led down the golden path of teaching that we CANNOT and SHOULD NOT take responsibility for our own health. The medical establishment has cleverly taught us that they are the ONLY ones who can diagnose and treat disease. We have been conditioned to believe that the medical establishment has ALL the answers for proper treatment. However, the reality is FAR different. The reality is that most people in the medical establishment simply don't know that easy, safe, non–invasive, inexpensive, and in–home methods even exist. The governing bodies (American Medical Association, Food and Drug Administration, National Cancer Institute, etc.) know these methods exist. In fact if you research this yourself, (which is easy to do) you can prove there is a long history of cover–ups and suppression dating back over one hundred years.

CANCER – Could a strong immune system be the missing link?

So why cover up such a simple and effective method that saves millions of lives while at the same time improving the quality of those lives? The answer, of course, is MONEY! Cancer by itself is a multi-billion dollar per year industry. Did you know that the average cost of conventional cancer treatment is \$250,000–\$750,000? Can you imagine how much money is at stake if we threw most every other disease into the mix? The amount involved is astronomical! That my friends, is the very foundation of this problem. GREED! What a sad state of affairs.

There is a simple solution to this dilemma, though. Do the research, learn the truth about this and take charge of your OWN health! Then let others know the truth.

Dan Clizer is a cancer researcher with 20 years of experience in Alternative Treatment and is the co-author of the new E-book, Cancer Secrets. For more information and research on new treatments,

Moducare – Immune System Supplement

By Tzaf

Moducare – Immune System Supplement by Tzaf

Don't you envy those people who never seem to get ill and who sail through the cold and flu season without a sniffle. Brimming with energy and vigour no matter how busy they are. And wouldn't you just love to be one of them? What's the secret? Its simple. Tap into your body's inborn power to prevent and treat diseases naturally. Colds and flu - fight them off! Infections - keep them away! Allergies - ease symptoms like magic! Stop envying those people who never get sick. Unlock the secret to a powerful immune system.

Short Story

The following story graphically illustrates the importance that your immune system plays in whether or not you stay healthy. A man gets on a flight from the Far East to Seattle with active TB. Of the 200 passengers exposed on that flight 40 subsequently test positive to TB. What made the difference on those that were able to ward off the infection? They had strong, vigilant immune systems.

Why we need to look after our immune system

Our immune system is an intricately connected internal army - able to destroy bacteria, viruses, fungi and cancer cells effectively when it is working efficiently. Unfortunately due to poor diet, high sugar consumption, unrelenting daily stress, environmental toxins, overwork, ageing - even our negative thoughts and feelings, our immune systems are being damaged without us realising it – by either becoming more suppressed or on the other hand causing the immune system to turn on the very body its supposed to protect. We need to look after our immune system and provide it with the fuel to fight

CANCER – Could a strong immune system be the missing link?

this never-ending battle.

Why Moducare?

A unique complex of sterols and sterolins involving a highly specialised proprietary process,

MODUCARE was developed as a result of the dedication of a man wanting to help his uncle recover from prostate cancer. It worked! MODUCARE gets to the root of the problem. Unlike supplements such as Echinacea which only stimulates the immune system - Moducare normalises any immune abnormalities and optimises and puts the immune system back into balance superbly- up regulating or boosting an under active response and down regulating an overactive one. The result is simple – Repairs any immune dysfunction or abnormality - and strengthens your immune health to its peak performance.

Instructions for use

As a food supplement take 1 capsule 3 times a day.

If you are pregnant, nursing, a diabetic or an organ transplant recipient or have multiple sclerosis do not use unless on the advice or under the direct supervision of a health care professional.

MODUCARE Natural Immune System Supplement. Restores, strengthens and balances the immune system. 90 Veg Caps - 1 Months Supply

For just £21.95 inc P+P
