Callaway ERC Fusion Driver – Long and Straight

By Ernie Horning

Callaway ERC Fusion Driver – Long and Straight by Ernie Horning

The ERC Fusion Driver is an ultra forgiving and accurate driver. This golf club is available through the "Callaway Golf Pre-Owned" website (www.callawaygolfpreowned.com).

The ERC Fusion Driver is available in lofts from 7.5 to 12.0, and is great if you are looking to drive the ball "Long and Straight". The 360CC carbon composite head, with a forged titanium face, is actually 75% lighter. The ERC Fusion's 45" shaft is standard, with either a "Regular D-2" or "Strong D-3" swingweight. This enables both the male and female golfer to swing the club with ease, without experiencing a loss in power.

The ERC Fusion Driver looks and feels great! How many times has your foursome stood on the tee box waiting to hit, and you start comparing each others drivers? You compare grips, weight, feel, take a few practice swings, trying to get an overall feel for one another's clubs. Put the ERC Fusion in your bag for your next round, and you will be the envy of your foursome.

I started playing with the Callaway ERC Fusion driver in the spring of 2004. I had previously played the Callaway C4, the Biggest Big Bertha, the Great Big Bertha, and the Big Bertha Warbird. Although I liked my previous drivers, and hit them fairly well, none compare to the success I am having with the ERC Fusion. I have become much more accurate off the tee, hitting more fairways, and driving much longer than my regular opponents. As you probably know, when you are longer and straighter off the tee, you score better. It is much easier to hit the green from 150 yds. out, from a good lie on the fairway, than it is from 170 yds. out, from the rough, or even the trees. The larger sweetspot provides me the accuracy and distance needed for tight par 4's and long par 5's. The ERC Fusion enables me to reach some of those par 5's in 2, cutting even more strokes off my game. It's great putting for an eagle every now then. The lighter feel allows me to slow down my swing producing much better contact. It is simply the best Callaway Driver I have ever played. And yes, although they might not want to admit it, my regular playing partners do envy me, especially as I am looking back at them from the fairway, waiting for them to hit first to the green.

The "Callaway Golf Pre-Owned" website offers these beautiful, powerful, slightly used golf clubs from \$139.00 to \$239.00. With a MSRP of \$449.00, this is quite a Golf Bargain. Whoever thought driving a golf ball "Long and Straight" could be so fun, yet so easy.

The Callaway Golf Club

By Paul Kirk

The Callaway golf club is one of the most popular and also reliable types of golf club in the market today. There are so many people (particularly retired men) that are fascinated with golf today and it is no wonder why the Callaway golf club is now in the peak of success in the world of golf clubs.

The Callaway Golf club is headed by Ely Callaway. He bought half of Hickory Stick USA and renamed it Callaway Hickory Stick USA. After purchasing it, he decided to hire the best people that would be an instrument in supporting his dream of Callaway golf club. He hired Richard C. Helmstetter to be the Chief Club Designer and this as others would say is the point of no return. The designs for Callaway golf club are truly revolutionary and innovative which is why the Callaway golf club is dubbed as the type of golf club that is unique and also high-performance kind golf equipment. After that, Ely Callaway renamed his company into Callaway Golf and then relocated from Cathedral City, California to a sleepy seaside town called Carlsbad, which is just north of San Diego.

One of the most innovative designs that the firm came up with was to create a stainless steel driver that had a larger and more forgiving head than any previous design. The CEO, Callaway dubbed it as "Big Bertha" which was derived from a German cannon back in WWI which was famous for its capability of shooting long distance range. This type of design was the one that made Callaway golf club a house hold name in the states because it experienced millions of sales and the Big Bertha type of Callaway golf club was the reason why Callaway became the number one manufacturer of golf clubs not only in the US but in the whole world which shows how popular golf is to the whole world.

At present, there are six classifications of the Callaway Golf club. The first classification is the drivers which are comprised of two models which are the Big Bertha Fusion FT4 and Big Bertha Titanium 454. The next classification of Callaway golf club is called the Fairway Woods. Fairway Woods have three types of clubs which are Big Bertha Fusion Fairway Woods, Big Bertha Titanium Fairway Woods, and Big Bertha Fairway Woods. The next classification of the Callaway golf club is a hybrid which is designed for long and distant shots. The model for this type of Callaway golf club is called Big Bertha Heavenwood Hybrids. The next classification is called irons which are divided into five types of models and these are Big Bertha, Big Bertha Fusion, X-Tour, X-18, and X-18 Pro. Another classification of the Callaway golf club would be the wedges and the model here is called Forged+ Wedges. The last classification for Callaway golf club is called the Putters. The Putters have two models in its classification which are Callaway golf I-Trax Putter and tour Blue.

The classification and models of Callaway Gold Club mentioned above are the ones that the firm manufactures. All of these models were made in the lieu with science, research, and practice. All of these models are worth a try and who knows? You might be the next Tiger Woods in the world of golf.
