Can I Really Make Money On The Internet?

By Bilal Babic

Can I Really Make Money On The Internet? by Bilal Babic

Yes, you can. Actually, I guarantee that you can make money on the Internet. This is not a bold claim.

I know you've heard that 95% (probably even more) people fail to make money on the internet.

I know you think you've tried all and everything.

Probably you have been through enough garbage on the Internet, spent countless hours, possibly a fair amount of money and if you've earned more than a hundred bucks then you have been really lucky.

Why is that so?

There are to possible reasons why you and the rest of 95% people failed to make money on the Internet:

- 1) You fail because, deep inside your subconscious, you don't believe that you actually can succeed
- 2) You fail because you simply don't know how to do it right

It's that simple.

So what are the ingredients for success that ANYBODY can follow?

- 1) Believe that you will succeed!

Can I Really Make Money On The Internet?

First of all you need to re-direct your immediate desire to make money online and BELIVE that YOU acctually will do it.

2) Don't take any advice from someone NOT actually doing it!

Believe it or not, most of the people selling "how to make money online" information aren't actually doing it themeselves. Don't listen to them. They don't speak from experience.

3) Learn from the best!

Long ago I heard these very wise words: "find someone in life where you want to be, do what they did to get there, don't do what they didn't do, and you will have what they have". Best Internet marketers have developed a practically foolproof ways to make money on the Internet. If you follow their proven formula (tested time and time again), you are guaranteed to succeed. The following is vitally important so please give it some serious thought as it can make or break you in the early stages.

Learning how to make money online is exactly the same as learning any other skill. It is not difficult but it is a step by step process... It doesn't happen overnight but day by day your confidence and success will grow, same as your bank account:)

Does Anybody Make Money On The Internet?

Can I Really Make Money On The Internet?

By Scott Michaels

There are many sites that will tell you that you can easily find ways of making money on the internet, but obviously most of these are scams. Of course, making money on the internet is possible, but not in the ways that you are likely to be told.

There is no get rich quick scheme that is guaranteed - if someone had thought of the secret to make hundreds of thousands of dollars over night, they would be using it for themselves, not selling it to you for thirty bucks. That is because the way most of these sites are making money on the internet is by profiting off of the dreams of the broke or gullible.

Nonetheless, it is possible to make money over the internet. Why, I do it myself as a freelance writer. The internet has several things going for it as opposed to working out there in the "real world". First of all, you can work from home, which is always very nice. Besides that, there are many other advantages to making money on the internet.

You can set your own hours, get money as soon as you complete your projects, and be your own boss. Besides this, if you are good at marketing yourself, the world wide web gives you unprecedented abilities to reach out to other people and make connections or sell your services quickly. However, there is no miracle solution. Just because you don't have to leave the house to make money on line, doesn't mean you don't have to hustle.

For me, I work mostly as a freelance writer, so I use several resources to meet potential employers for that work. I use craigslist a lot, because there are so many jobs offered every day that you are bound to quickly discover business contacts that are useful to you. Of course, there are many better resources for making money on the internet, but most of them are connections.

You have to develop them yourselves through getting referrals from people you have worked for. Although you often never meet the people you work for face to face, when you make money over the internet, it is basically just like anywhere else in life: it is all about the connections. That being said, it is not hard to start making money on the internet, but it is hard to make your living on it and not just a supplementary income.

I went from zero-\$12,000+ per month in 4 months flat ...and I want to Reveal to You how I did it – in step-by-step detailed instructions.
