**Casino Gambling – The Choices**

**By Adel Awwad**

Casino gambling isn't just a few Poker games with a Roulette wheel thrown in for good measure;

your casino offers many different games with a variety of stakes. For the frugal among us, the nickel slot machines are a very good bet. You can spend an entire evening gambling with as little as five dollars and still enjoy the thrills of hitting a jackpot. The quarter slots are more popular, but if you have more to spend, this kind of gambling may be right up your alley. Some people do nothing in their favorite casino except play the slots.

For the card player, casino gambling offers blackjack and poker as main attractions. Casinos vary these games depending on the house rules. Some tables have lower stakes but use more decks to keep the game interesting, other gambling houses feature higher stakes games with one or only a couple of card decks in play. Make sure you know the house rules on subjects like table etiquette and gambling limits before you play. Some houses are very particular about when it's ok to touch cards, and what's considered a forfeit. For example, many casinos won't recognize a hand if any card touches the discard pile. Knowing these details will come in handy when you're ready to gamble.

The roulette wheel is another kind of gambling altogether. This classic game, along with the dice tables, can be confusing for a newcomer. The best thing to do if you are unfamiliar with any game is to watch and ask questions before putting gambling any money. The casino staff is trained to help you and nobody will think you're foolish for learning the rules before you put down any cash.

Casino gambling may also include video poker, games of skill and electronic dice games. Once you've learned the ins and outs of these games, you may find them as exhilarating as the old-fashioned versions of blackjack, craps and poker. As always, know your limits, go to have fun and enjoy your casino experience!

## **Guide to Gambling Online**

is one of the most comprehensive guides

to casinos online. Gambling online is set to become the rage of the future. With more and more people having less time there is a need for an alternative choice.

Like all choices the Internet takes precedence. Consider that there are more than a thousand sites online that feature gambling and casinos as the main selling service. Out of these thousand only a couple of hundred will be legal and safe to play at.

Sure gambling is a risk but it's a risk taken after careful consideration of the odds. Many site owners know how to reduce your odds of winning and ensure that the house always comes out on top.

This is where you need to learn how to raise the odds. When gambling at an online casino makes sure:

1. The Casino has an established help line.
2. There is a valid phone number provided.
3. Known and recognized forms of payments are accepted.
4. The casinos are based in the US.
5. The payments are made immediately.

Only after these points are considered can you play at the casino with the belief that every win will be fair and every loss a twist of fate! Consider sites that feature casino guides when making your decision e.g.

is a site that ensures that you make an

informed decision even if it is to gamble!
