**Cherokee People Will REturn by Robert Bruce Baird**

Here is a brief Intro for my book Cherokee People Will REturn. Yes, the E is intentionally capitalized.

It does no good to lie about the past even if it seems to make more money due to corrupt practices carried out by the invaders of Paradise. Genetics will be a difficult thing for various historians who ardently support their tenured 'me-too think' to overcome. I get support almost every week for my history from just this one discipline of science. Even the genetic or DNA evaluation of lice has contributed to this history in recent months. The claim that Australia or S. E. Asia is the origin of the first Americans has just hit the airwaves in September 2004 after I had finished writing this book. This is where I posit that pygmy people like Mungo Man who had chanting harmonic science came from and Churchward would love to see what is being shown from all so many disciplines today. Reuters carried this information - "We want to make headlines from heads," said Professor Clive Gamble of Southampton university. "DNA will give us a completely new map of the world and how we peopled it."
