**Child Safety And Child Protection: Easy Steps You Can Take Part 1 Of 3**

**By Thomas Trotts**

Did you know there are over 2,000 reports of missing and abducted children to the FBI everyday?

That's an incredible number, and that's only the ones that are actually reported.

This is 1 of a 3 part series with some simple child safety steps you can take that will greatly minimize the chances of your child becoming missing or abducted. The experts recommend that you teach your child the following child protection techniques:

Here we go...

You should always be sure your child knows his/her name, address, including city, state, zip code; phone number, including area code; parents' names, work addresses(or atleast the business names of where they work), and phone numbers.

Your child should feel confident using both push button phones, as well as, the old style rotary-dial telephones.

Always make sure your child knows how to make an emergency call to you or emergency services from a pay phone.

How to make a long distance call (both directly to you using the area code, and by dialing "0" for the operator).

Your child should never tell anyone over the phone that she is home alone, and NEVER open the door to strangers when she is home alone.

Never to answer the door when home alone. Remind your child to talk through a door or window to anyone delivering a package, and to tell the person to leave the package at the door. Teach your child how to call your community's emergency assistance number (often 911). Make sure he knows a neighbor to call if someone tries to get into the house or if there is any kind of emergency.

They need to be aware that it's not safe and should never go into anyone's home without your permission. Children should learn who's homes they are allowed to enter.

These are just a few of the basic child safety lessons you can teach your child to keep them safe and out of harms way. keep an eye out for "Child Safety and Child Protection: Easy Steps You Can Take" – Part 2 of 3. Where we will discuss some child safety and child protection techniques you can take when your in public places, or when he/she might find themselves alone.

## **Child Safety Tips**

**By Monique Dyer**

### **Child Safety Tips by Monique Dyer**

#### 6 Ways to Prevent Child Abduction

1. Never leave your child alone in a public place, car, or stroller.
2. Point out a safe house or houses in your neighborhood, where children can go if they are in trouble.
3. Check older friends of your child and all potential babysitters.
4. Do not use clothing and toys with your child's name on it. A child will less likely to fear someone who knows his/her name.
5. Always accompany your child into a public restroom.
6. Keep an up-to-date color photograph of your child, a Child ID, and medical and dental history, and have your child fingerprinted.

Child abduction is a growing concern and there are simple precautions that you can take to help safeguard your children.

Monique Dyer, President of Accurate Drug & DNA Testing, a Atlanta-based company selling on-site

drug testing kits to businesses and DNA Testing services to consumers. She currently has a bi-weekly child safety tips newsletter, promoting safety with Children's identification, fingerprinting, and DNA Kit to parents. To subscribe go the website at the bottom of the page
