Children are the first scientist in the universe

By c.krishnan

Children are the first scientist in the universe by c.krishnan

=====
CHILDRENS ARE THE FIRST SCIENTIST IN THE UNIVERSE.
=====

Children may born with 'gold spoon' but not with bad character. It is the parent's guidance and surveillance determines their character.

So as a parent you must guide them properly to become a good citizen to our nation also to your family.

"Akio Morita" who is the founder of the world best communication and entertainment giant "Sony" was born only in a small town.

His father was a traditional type where as Morita was contemporary. Morita used to think every thing on a positive side.

His idea for a packet radio satisfy today the millions of people as a mobile entertainment kit.

The idea of developing the packet radio came as a spark in his mind on seeing the statue of another world best communication giant "Dr. Philip", founder of world famous 'Philips'.

Morito into action and developed the concept of packet radio on seeing the statue of "Dr. Philip".

Children are the first scientist in the universe

The only thing in his mind at that time was
"When Philip can do" "Why can't me".

The result of such rationale and positive thinking made him to develop the "Sony" packet radio, which is now satisfying the millions of peoples around the world as a mobile radio, easy to fit in their packet and also to their ear also.

Now the "Sony" has developed as a communication giant whether it may be a TV, or a mobile phone.

If Akio Morito has not acted positively on seeing the statue of Dr. Philip the world would not have experienced the revolution in the field of communication.

You can hang the picture of "Akio Morito" in a place where your children's attention is drawn regularly.

You can hang it over behind the TV or in their Bed room or in a place where you think that it can draw their attention much.

The picture and thereby the story of Mr. Akio Morita will consciously or unconsciously record in the minds of your children.

When consciously or unconsciously recorded the subconscious mind will give positive ideas or thoughts on the line of the thinking already recorded in the subconscious mind.

Don't you be proud of your children if they are another Akio Morito or more than another Akio Morito.

Definitely your children can be.

The immediate concern of you now is that you don't have the image of Akio Morito.

Don't worry. It is not a great worry. You have the alternative. You can write the name of Akio Morito in a piece of paper or in a card and paste it in a place where your children's attention is drawn regularly.

Don't forget to brief them the profile of Akio Morito. Once they heard the profile they won't forget it even if

Children are the first scientist in the universe

you ask them to forget it.

Children's level of remembrance is so acute than the matured.

No children born in this world is genius on his birth but he is made genius by the circumstances and guidance.

The circumstances and guidance you create for them make them as genius.

As a parent you must have the leadership qualities of tolerance, motivation, humanity, good behaviour, love and affection.

If the leader is worst then the followers will also be worst.

You should have the leadership qualities. If a good follower is developed then he will also lead his followers the same way you did and the world can see another respectable leader and law abiding citizen.

Another important aspect is that you should find out your children's ability or their interest from their behaviour.

Explore the children's ability and interest from their activity, speech, clarification, when they are between the age of 5 and 10.

You should ensure that their ability and interest should be only towards their welfare.

You should constantly explain to them and create circumstances for achieving their ability.

Leaders or personalities who have achieved good results similar to the aim of your children should be repeatedly made known to them.

Means of visual remembrance like images and bio-ography of well known personalities will yield good results in this regard.

Another important aspect you should concentrate is that the children should be motivated for self-reliant for all their needs. Of course it will be very difficulty for them in the initial stage of their age to become self-reliant

for their needs.

They can be helped in the initial stage for all their needs like eating,bathing,dressing,placing the things in a proper place.But you should not help them always.They should be trained properly so that they will be independent for all their needs in future.

Further you must explain your children to have their regular exercise.

Once they become interested in doing exercise they will know the importance of keeping the body well and they won't be addicted to any bad habits also.

You should motivate them to read epics of all religion. They convey good message for the benefit of mankind in their own style.

No religion or epic encourages hat redness among peoples. The unique aim of all epics and religion in this world

are aimed towards love,humanity,brotherhood, and good morale.

Good communication and pronunciation training to your children by you will be very useful for their better future.

It is natural that the children will find it very hard to communicate or pronunciation,in the initial stage.

However you should train them for a better pronunication and presentation so that they cannot face any awkward situation or feel inferiority complex among other children.

When the children are born in this world they are like a small plant.

The plant can be seen as a big tree,giving fruits to many more decades to the present and future generation only if it is properly preserved.

The Power of Feeling

By George Lockett

The Power of Feeling by George Lockett

We see all the top Scientist and Physicist and Business People, all using their mind to try to understand life and the world around them. What they find is that the more they look into a subject the more they realise how little they actually know.

Yet the true process of knowing is not in understanding, it is in being. It is through your feeling and releasing, relaxing and centring your energy that you can truly know whom you are. Take a deep breath and stay conscious of your breathing as you reach out with your feeling.

This works best with your eyes close using one's imagination, creating images with your feelings and expanding your consciousness outwards. You can imagine your energy field connected to the Earth and being as one with the planet. As you do this you may realise that your consciousness is margining with that of the planet and you are helping the planets own consciousness to wake up and become

Children are the first scientist in the universe

aware of its' Self.

You can expand again and feel the connection to the Sun and Moon and all the planets of our Solar System. Astrologers have known for years of this connection and influence. It is time now for us all to wake up and put our energy in tune with planet Earth and the Solar System. Just allow yourself the freedom to dream and feel the connection.

We should not limit ourselves to imagining that we are just connected to the Solar System. We are part of a much bigger system and we should feel the connection to all the stars and planets in the Milky Way and the Whole Universe. Then expand further and feel all the Dimensions and the Parallel Universes and the Whole Omniverse. There is truly no limit, but the more we feel connected the more support we will have in our daily lives.

I have made some meditation recording to help with this if you would like to try them. Just follow the link and instructions on the page: http://www.healergeorge.com/guided_meditation.htm

I would recommend listening to the second one first; "Connecting to Earth and Universe – Guided Meditation" as this is a good general meditation and will balance and align your energies with both the Earth and the Universe.

You can email me at healergeorge@ntlworld.com if you have any questions or requests.
