Comparing and Financing Tummy Tuck Prices

By Alison Wheelock

When undergoing any sort of medical procedure, cost is going to be a factor. Medical care is not cheap. When undergoing an elective surgical procedure, such as an abdominoplasty, the tummy tuck prices can be prohibitive, especially because most cosmetic procedures are not covered by health insurance plans. However, many people can finance tummy tuck prices to make the procedure more affordable.

Tummy tuck prices vary among different surgical outfits. As well, tummy tuck prices don't always include the same things. For example, some tummy tuck prices quote might only account for surgical costs but not consultation costs. When you visit the doctor's office, they will give you an estimate of tummy tuck prices. When comparing tummy tuck prices between different surgeons, keep in mind the different costs that are or are not included. Usually, a surgeon's fee will be charged. Next, surgical prices might include the cost of the operating room and surgical supplies. You will also be charged for an anesthesiologist, who will put you to sleep during the procedure.

Next, you'll be billed by the operating room, which will charge for lab, X-rays, and some special supplies. These costs are separate from the tummy tuck fee. Sometimes the procedure takes place at a hospital and sometimes it can take place at the surgeon's own private practice facility.

Most surgeons will accept many forms of payment, including cash, check, and credit cards. Some doctor's offices participate in financing programs that will allow you to break down the costs of the surgery in monthly installments. Some offices might have a relationship with a local finance company. Others might have a relationship with a national finance company. There are several companies that specialize in financing cosmetic surgery costs. You apply directly with the local or national finance company. Once you're approved, the finance company will issue a check to the doctor's office for the amount of your surgery. Your monthly payments will start approximately 3–5 weeks after the funds are disbursed to the doctor's office. Most surgeons will require payment at least 2 weeks before the time of the surgery. Some will require a down payment before you can even make an appointment for surgery. If you decide to cancel or postpone the surgery, make sure that you do so with adequate time for notice. Otherwise, you might be charged a cancellation fee or even forfeit your down payment.

Comparing and Financing Tummy Tuck Prices

Some surgeons will offer their own financing in-house. In other words, instead of paying a finance company every month, you'll be paying the doctor's office directly. Whichever method you choose, make sure to compare costs, both of the doctor's office and the financing rates.

Is a tummy tuck for me?

By Keith Londrie

Is a tummy tuck for me?

Abdominoplasty, or "tummy tuck" is a major surgical procedure that removes excess skin and fat from the stomach and tightens the abdominal muscles. Many people who are unable to achieve desired results with traditional diet and exercise seek a plastic surgery tummy tuck. The tummy tuck is the sixth most popular plastic surgery procedure in the US.

There are different types of tummy tuck surgeries, and the main difference is how much work is done and how large of an incision is needed. A mini tummy tuck is only performed on the abdominal area below the belly button. A traditional tummy tuck surgery is performed on the entire abdominal area, from the lower rib cage to the top of the pelvis. When considering plastic surgery tummy tuck, it is important to meet with a qualified physician to discuss what options are best for you.

To determine if you would be a good candidate for tummy tuck surgery, ask yourself the following questions:

Are you within about 30% of your ideal weight? If you intend to lose more weight or become pregnant, you should probably wait to have a tummy tuck.

Are you physically and emotionally healthy? The best candidates for tummy tuck surgery understand the associated risks and have the good health necessary for proper healing.

Comparing and Financing Tummy Tuck Prices

Will you have the time to allow your body to heal properly? In some cases, an overnight stay in the hospital may be required, and healing can take up to 6 months to fully recover. During that time period, with your doctor's permission you will be able to return to most normal activities.

Can you afford the cost of a Plastic Surgery Tummy Tuck? Most insurance companies won't cover the cost of the procedure. It is considered elective surgery.

Further consultation with your physician will of course be necessary to ultimately determine if a plastic surgery tummy tuck is right for you. It is important to do some research about surgeons in your area before you seriously consider a tummy tuck. Referrals can be very helpful, and quality tummy tuck surgeons tend to be concentrated in certain locales.

For example, in Newport Beach there are many qualified surgeons to select from. Similar results can be obtained in the greater Orange County as well as in New York City. Be sure to check the surgeon's credentials with the American Board of Medical Specialties and your state medical board. In short, before your research before you decide on a tummy tuck.
