DIRECTV DVR Replace Blockbuster?

By Gary Davis

What is a DIRECTV DVR? How can DIRECTV DVR replace Blockbuster? Home video libraries have

traditionally been for those with either lots of money to spend on legalized copies or for techno-pirates of the working class with little regard for the system of copyrights. While most people are not politically inclined to anarchism in the US, they are open to defending the anarchist's "free reign of information" as an excuse for making or buying illegal copies of Audio, Video and even Written materials.

Both the digital world and popular pressure finally gave in to the "free reign of information."

The DIRECTV DVR is a replacement for those old home video libraries that might have up to 300 VHS tapes along the wall, each with six hours of TV, soap operas, Movies, MTV or whatever recorded on them. A DIRECTV DVR can record up to 70 hours of information in one little box. The DIRECTV DVR will improve with time, as will technology and far from now, Video Rental stores may become obsolete.

Some political philosophers and statesmen have already conjectured what the future of our nation is to look like some 30 years from now, and one of these talking heads insights tells the tale of

DIRECTV DVR Replace Blockbuster?

the downfall of Video Rental stores like Blockbuster.

DIRECTV DVR is Digital

When Beta audio–video recording and playback media first arrived on the scene way back in prehistoric 1975 with 100,000 VCR machines, they were superior to the competition, but wouldn't sell their patents. VHS came along in full and blew Sony Beta machines right out the water. Like "wow?!?" What happened? That was most peoples' sentiment at the time, at least those who had invested in Beta machines.

8–Tracks were being installed into Ford dashboards as early as 1966 and was the major audio

format for cars in the 1970's, in fact was still being used by Madonna and Michael Jackson in the 1980's with such hits as Thriller. But all of a sudden Sony Walkman comes along with Compact Cassettes (which already existed), and blows 8–track out of the water... Well, mini disc sure seems like it is repeating 8–Track's history with mp3 players all over the place.

DIRECTV DVR is Revolutionary

Lets just look at the evolution for a second: 8–Track, Beta, Compact Cassette, VCR, Laser Disc, Compact Disc, Mini Disc, DVD, MP3 player, DVR and finally DIRECTV DVR. Well, digital didn't sell when it was fighting analog super–giants that set "standards" for excellence, but DVD, computer sales and "free reign of information on the internet" changed all that.

People know what digital is the "now", and they know it is superior. People know that MP3 players don't skip tracks while driving or running, nor do they eat tape. Cell phones can play back MPEG and MP3 uploads from any digital storage space, and people know technology is picking up pace. Personal Audio and Visual libraries that occupy space are being replaced as technology speeds up and puts everything into Hard Drives. The Satellite TV DIRECTV DVR is a media storage device unlike any other that has ever existed. DIRECTV DVR is revolutionary. Big or small, tech is

DIRECTV DVR Replace Blockbuster?

evolving and DIRECTV DVR will eventually blow Blockbuster out of the water.

DIRECTV DVR is the Future

How long will it take for DIRECTV DVR to fully replace the Audio–Visual media distribution of the

last 50 years? Some specialists dictate that Blockbuster like media distributions of music and

television libraries will be overrun by homeowners with Satellite TV, Radio, Movie Channels,

Music Television, Internet and PayPerView all in one monthly service within the next five to ten

years, maybe less. It all depends on how fast Satellite TV companies can compete with DIRECTV DVR

multimedia digital storage and playback devices.

The more competition, the faster hardware will evolve and DIRECTV DVR is setting a standard for

excellence that will only evolve and upgrade itself with every new advance in technology.

"DIRECTV DVR is the future of multimedia digital home storage."

an authorized DIRECTV

retailer, has over five years experience in the Satellite TV business and has written numerous

articles on the subject.

Is Direct TV Right For Me?

By DeWayne Strickland

Are you confused with satellite choices? There is no doubt, that satellite is better than cable, and the choice comes down to Directv or Dish Network. Are you ready to find out which service is better? Are you ready to watch the exact selection, of the networks you so earnestly desire? Get ready to make the choice of a lifetime!

When it comes down to choosing between Directv or Dishnetwork, you need to focus on what you watch the most! Are you a sports fanatic? Are you a person that likes watching movies, with non-stop

DIRECTV DVR Replace Blockbuster?

action? Do you want programming that is safe for your children? Do you like sexy movies?

Whatever your choice may be, Directv seems to be the sports dominator! If you cannot not live without sports, then Directv is the clear winner! Hands Down! Imagine watching the football game with crystal clear clarity! Picture what your friends will say, when you have Directv, and they come over every sunday!

One impressive point about Dish Network, is the "new" Dish Family! If you are concerned about, what influences your children, then Dish Network will bring "joy" and "fun" to your home. Just think, your children can watch all their favorite shows and you can rest assured, that they will not see any type of violence or bad language.

"Let's face it, kids get curious and this will be one powerful way, you can control what goes into their minds and ears. This is the finest, in satellite tv control!"

The pricing for Directv or Dish Network is outstanding, considering the basic packages. You can go with the basic package and pay a small amount every month. Directv offers more, when it comes to sports, with NFL Sunday!

People get afraid of the prices, but when you look at what you really want, it is very easy. Look at how much people pay for cable! Do you want to pay for cheap cable and then six months later, watch as your spending money disappears! This is the satellite tv age, not the cable age.

As both companies get more competitive, you will see more deals and amazing rebates. Both Directv and Dish Network give free products and outstanding rebates. When you compare both networks you will see Directv is the winner! With all the deals, which ever you choose, it will only get better!

You will see a lot of Directv dishes, wherever you live and the reason is customer service! Even more of a reason, is Directv's rebates! You get a free DVR after rebate and Tivo! The DVR allows you to record your favorite shows and movies, while Tivo gives you the ultimate control!

Tivo will automatically find and record programming that you request for later viewing. Imagine a search that can record the show by title, channel, actor, and keyword! You can literally watch what you want when you like. Say good bye to the tape-based recorders and hello to watching a program that gives you the option of not recording reruns. Also, you do not have to reprogram every week. Directv gives you the dream and it is for your convenience.

People, the search is over and it is Directv! I love movies and I love being able to watch, what I want, when I want! Directv, combined with Tivo, is a miracle for the lover of movies and sports. You have the selections you want and the price is very affordable.
