Do Not Drink And Drive - If You Do, At Least Consider This

By James Hodges

Drinking and driving is not only dangerous for the other guy but also the driver and the passengers

of the car itself. You should refrain from drinking and driving as there is a significantly increased risk of car accidents, damage to property and injury to people. Prevention is always better than cure. Hence, drinking and driving should not go together ... in fact it is stupid. Heavy penalties can be impounded on the accused, like suspension of driver's license, fines, a term in jail and confiscation of vehicle registration plates.

Every year there are thousands of people getting hurt or dying due to the drinking and driving. About 20% of the traffic fatalities all over the world take place due to drunk driving. We, like responsible citizens, should understand the ill effects of drunk driving and refrain from doing it. DUI or Drinking under the Influence of Intoxicants may cause problems in the present and in the future. The police should carry random checks on drunk drivers, especially at night to catch the offenders and reduce the menace. A breath analyzer test is the most common test used to catch the offenders.

Also, studies show that half of the offenders caught were not under the influence of alcohol but other banned substances like drugs. Parents should warn their children against drunk driving and show their own daily lives to their children by example. They should make their children understand the importance of being a responsible citizen. And, they should do nothing to bring any harm or any injury to people including something as irresponsible as drunk driving.

There are certain measures that can be implemented to curb drunk driving. Regular checks for drunk drivers on the road can be carried out by the law. Offenders should be severely punished in the form of levying heavy fines and penalties. Licenses of regular offenders should be suspended or terminated. Rehabilitation programs should be conducted for those people who can't kiss the habit goodbye. Every state should provide adequate information on the bad effects of DUI at the time of the driver's exams.

Many cars will have technological devices available like alarm systems in case the driver inside falls asleep. They will soon be fitted with anti collision devices so that the car brakes automatically if it is about to crash with another object in the front or the back.

Do Not Drink And Drive – If You Do, At Least Consider This

Remember by being a responsible citizen you set an example to other people as well. Do not unnecessarily force others to drink at your parties. See to it that the party gets over well within time so that people can leave early. And also provide alternate means of transportation for those that do drink.

If you are arrested for DUI, then hiring a DUI lawyer proves to be the best decision. Driving under the influence can have serious consequences on you if you are involved in a car accident. You may face consequences like jail or prison, penalties or fines, vehicle impoundment, etc. The DUI lawyer is familiar with the intricacies and procedures involved with DUI charges and are your best bet if you find yourself in such a predicament.

The True Cost Of A DUI

By "SearchArticles.net"

Driving while under the influence, also known as DUI, is not worth it because not only are you incapable of driving safely, but you are also very likely to receive a ticket. While you might think receiving a DUI simply requires you to pay a fee and try to get out of the ticket a DUI is really more expensive than you might have ever imagined.

Receiving a DUI might cost you thousands of dollars, but it may also cost you emotionally, physically, and others will pay as well. So, before you drink and drive you should really consider all of the many costs you might face as well as the effects your actions will have on the lives of others.

First of all, a DUI does cost a lot of money if all that happens is you are pulled over and receive a ticket for driving while under the influence. Your car might be impounded, you will be taken to jail, and you will receive a ticket, as well as other fees and fines that might apply to your specific situation. This will cost you a pretty penny.

Do Not Drink And Drive – If You Do, At Least Consider This

Then, there are the emotional costs of a DUI. You will likely feel ashamed and embarrassed, and that is if you just get a ticket. In addition, you might wreck your vehicle or the vehicle of another individual, causing more emotional pain and suffering. Then, if you or others are injured you can count on significant emotional suffering.

Physical costs are likely with driving under the influence because accidents happen more often than not. You might injure or even kill yourself, not to mention others. Imagine how you will feel if you cause yourself to be paralyzed or kill another individual? These are some hefty costs of drinking and driving.

Then, there are the costs to other people. Your family will feel embarrassed and ashamed if you receive a DUI citation, not to mention if you are killed or kill someone else because you chose to drink and drive. Then there is the family and friends of other individuals that you might injure while drinking and driving. They will feel angry and hurt as well.

Obviously, there are a lot of costs associated with drinking and driving; most of them will change your life and the lives of others forever. So, if you want to drink make sure you call a cab or at least have a designated driver to ensure you get home safe and sound. Avoid all of the costs of a DUI and don't drink and drive.
