ERW Pipe by Hoffman Fang

KINGLAND PETROLEUM-GAS PIPELINE CO., LTD. is situated in the downtown of Huzhou City of the Yangtze River Delta, the most developed area of China. It is 150km from Shanghai to the east, 90km from Hangzhou to the south, 90km from Suzhou to the northeast, 60km direct from Wuxi linked by the Tai Lake. State Highway No. 104, State Highway 318, Xuan-Hang Railway, Nanjing-Hangzhou-Ninbo Express Way, and Changxin-Huzhou-Shanghai "Oriental Leihn" Canal pass through it.

Kingland Petroleum-Gas Pipeline Co.,Ltd sponsored by Kingland Group, one of China's biggest piping manufacturers,operates a modern and world class large diameter electric resistance welding steel pipe mill line supplied by Bronx International Incorporated and Abbey International Ltd., the world-leader in the tubing and piping industry. The total manufacturing facility covers 216,450 square meters of land and production capacity is 300,000 metric tons per year.

Kingland steel pipe is produced for round pipe in a size range of 8-5/8" through 24" diameter and square pipe in a size range of 175mm x 175mm thru 500mm x 500mm and rectangular pipe of 200mm x 150mm thru 600mm x 400mm, in lengths up to 72 feet and in API grades A through X-70. Kingland steel pipe has many applications including high pressure oil and gas transmission lines, distribution main lines, offshore gathering systems, steel pipe pilings and structural applications. The pipe meets or exceeds API specifications. The mill produces steel pipe in 8" through 24" diameters, 175mm x 175mm thru 500mm x 500mm, 200mm x 150mm thru 600mm x 400mm and has a wall thickness capability of up to .750 inches.

Product Highlight Include:

Line Pipe for Petroleum and Gas Transportation |219.1~|630

Low Pressure Pipe for Liquid Delivery |219.1~|630

Casing Pipe |219.1~|508

Structural and Structural Round Pipe |219.1~|630

Structural and Structural Profile Pipe 175x175 ~500x500 & 200x150~600x400

Of which, the D508D630 sizes of ERW pipes are among the biggest ERP pipes in the world

ERW Pipe

Product Features:

Broad application, even wall thickness, good inside and outside appearance, and precise sizes. clean, non toxic, anti-corrosive, aging proof, high strength and long life.

Application Fields: widely applied in the oil pipe, casing pipe, natural gas, chemical, city pipeline gas, water transportation, liquid gas, air, steam and chemical material for low pressure liquid delivery, or general structural pipe, as well as heat power, construction, steel structure, bridge, piling and so on.

Company also incorporates many mechanical, pipe engineering, piping process, hydraulic, ultrasonic tester, electrical engineers and professional management team, so as to ensure production

technology, operation process, product quality, selling capabilities and operations being ranked at the world-class level.

The quality is the top priority of Company, so Company operations strictly complies with the ISO9001:2002 international quality system. The QA/QC center is equipped with the measurement, physical and chemical, material testing instruments and equipment, to make an all-round monitoring on the production process, and guarantee the product quality and application performance. Our products comply with API, GB/T, JIS, ASTM, DIN, EN and extra requirements.

Service was to be the cornerstone of the Company's operation: "Meeting the individual needs of each customer by producing and delivering the highest quality steel pipe on a timely basis."; Having adopted these principles in 1982, the name "Kingland" has become synonymous with service and with highest quality pressure piping; and the success of these endeavors is reflected by the confidence today by its many customers, marking Kingland as a leader in its field.

Our goal is to provide quality products to our customers at competitive prices with service that will ensure long-term relationships with our customers. Let's go together to create a prosperous piping environment and look forward to your visit!

Building a BMX Bunny Hop Trainer.

By Written by: Ivan Gotta Crotchful

Building a BMX Bunny Hop Trainer. by Written by: Ivan Gotta Crotchful

Learning to get enough height to start grinding and stalling can be a real challenge for the beginning BMX biker. Here is something that can be built and used to get the heights needed. The best part about it that it is cheap and easy to build. Materials can found at your local lumber/hardware store. The materials needed are as follows;

2-2"x4"x3' board

1-1/2"x8' piece of hard plastic water pipe.

20-2" finish nails.

1-3/4"x1'x4' plywood

4-3"deck screws

With the materials assemble as the diagram illustrates.

"You can see the detailed picture at www.evilmx.biz under articles page".

The 3" deck screws come up from the bottom of the plywood into the 2"x4"x3' boards.

The finishing nails are nailed into the board about 1/2" to 3/4" The nails provide a place for the plastic pipe to hang. You can put the nails 1" apart going up on each side.

Using the Bunny Hop Trainer.

Set the trainer in the middle of the area you are going practice. Set the pipe on the lowest nail to get use to it. Start from the opposite side where the pipe hangs and ride towards the pipe and hop over it.

If you hit the pipe it will simply fall off the hanger. When you clear the pipe with ease raise it another 1".

You will find after using the Bunny Hop Trainer your grinding and stalls will be easier at the Skate Park or street riding. You can amaze your BMX and skateboarding hombres with your new learned skills.

Ivan Crotchful is a BMX flatlander who contributes articles to EVILBMX. He claimed to be a nymphomaniac until he found out what it really meant. He use to listen to a punk band called The Nymrods and he thought a nympho was a band groupie. You can read this article and others at www.evilmx.biz.
