Earn Money Playing Slot Machines... Or Not!

By Ralf Vinogradov

Yay, what a life would that be – sitting behind the fancy slot machine, hitting buttons, sipping Bud

Light and constantly cashing out big bucks, or coins. Sure, we know that casinos (even online casinos, yes) take their "edge" and earn hideous profits, but we don't think about it when we step into a local casino or log on to our favourite online casino.

There's always a constant battle between "us" (the players) and "them" (casino) and most of the time we're pretty equal, until the slot machine suddenly turns into a money-leeching demon and starts eating our cash. So, after losing again, you ended up reading this article that has a title which gives you some hope.

Not that I want to sound rude, but reconsider because you won't win your money back. Every bet you make equals giving your money away. Actually, there's only one way to gain a profit visiting a casino – that's when you sign up for a casino's club card and go visit the place once in a while. You won't play but always claim your "Club Member Bonus" free drink. After drinking it you should leave the place, but knowing you guys, that almost never happens.

For people who still believe that they can win with slot machines, I have listed some myths and rumors that aren't true. Believing in them brings you debts and misery.

Some people believe that a poorly paying slot machine is about to hit big, maybe even a jackpot, so it would be smart to keep on playing or even raise the bets::

Well, actually there's no difference if the machine has been paying poorly for a long time or not, because each spin is unique and totally random (IF, that is, you're playing at least Casino Control Commission or a GamblingRalf approved casino and the machine uses well-known software). There's different situations in land based casinos, because even if they claim that slot machines payout percentage is fixed and constant, it still happens sometimes. The payout percentage has been lowered to nonexistent and you can keep on playing and losing forever. There's also no such thing as "feeding the slot machine" (this equals losing your money in order to win it back later) or "milking it".

Earn Money Playing Slot Machines... Or Not!

Talking on a cell phone when gambling drives high tech slot machines crazy and helps to win big...or not! Actually some cell phones damage digital slot machines (especially before GSM coverage, when NMT was a superhit), but I haven't heard any stories of players being able to cheat the casino with this trick and withdraw the money.

I know a few players who have had sudden \$100,000 on their bankroll and weren't paid, because the computer chip made a mistake (probably caused by cell phone). Every bet and win has to be proved by a slot machine's previous winnings history, which is saved and constantly checked.

::Temperature of the coins affect slot machines and payout rates. Hot coin means more money!::

Another twisted fairytale. If you're already so credulous, don't visit casinos at all – you will gamble your brains off like that and go home crying. Computer chips have a RNG chip (Random Number Generator) that isn't affected by anything, even not by the coin you have stored and heated up

between your buns.

We could continue this list, but I'd rather not do it because it all comes down to one thing – in the long run there's no way you can beat the slot machine and steal its edge. If winning was easy, there would be no casinos. There's no simple "How to Beat Slot Machine" tactic, only some simple rules that should be followed to keep your losings as low as possible.

Playing Online Slots

By Kevin Rose

OK, maybe you don't get to feel the slot machine handle in your hand, but when you play online slots you don't have to put up with the crowds, the traffic, or the person next to you spilling his drink in your

Earn Money Playing Slot Machines... Or Not!

lap. Online slots are hot and you can win a lot of money without ever leaving your home.

You can find multi-line online slots, progressive online slots, 3-reel online slots, 5-reel online slots and bonus online slots nearly everywhere you look. A lot of the online casinos have online slot club cards where you can earn prizes and bonuses just for playing.

The three-reel online slot machines have three reels and only one pay-line. These are the most basic of slots with the smallest jackpots.

All multi-line slot machines also have three reels, but they have multiple pay lines which offer more chances to win.

Bonus online slot machines offer free bonus spins which give you additional chances to win without risking your money. Some machines have a second screen where you can win additional money.

Online slots games are probably the most popular kind of gaming on the Internet. Although online slots are a game of chance, and no skill is required to win, you can increase your chances of winning more than you spend if you play strategically.

One of the best online slots strategy is to participate in online slot machine tournaments. Slot tournaments are very popular these days and you can find them at small and large online casinos around the world.

Online slots tournaments are exciting, fun, and there are some huge cash prizes available. In fact, some tournaments offer prizes as high as \$25,000 for first place, \$10,000 for second place and \$5,000 for third place winners.

Online slots tournaments are often not open to anyone who is not a slots club member. That's why it is important to join online slot clubs if they are offered. You'll usually receive notification of an upcoming online slots tournament via email or when you log into your favorite online casino.

Online slot tournament spaces fill up quickly and once they are filled no one else can join. Keep an eye open for upcoming online slots tournaments and join one if you can.

Another winning online slots strategy is to play progressive online slot machines. This type of game involves a network of online slot machines that are linked together electronically. A percentage going into each online slot machine is added to the jackpot. If a player hits the jackpot symbols they win the pot. You are usually only eligible to win the jackpot if you play the maximum number of coins for each spin.

Remember that playing online slot machines is fun, but it's still gambling. Never risk more than you can afford to lose, and turn your computer off for the night if you're having a losing streak. There's always

another day to play online slots machines.
