**Every Truck Lover's Dream:**

**By VJ Gibson**

**Every Truck Lover's Dream: by VJ Gibson**

Truck song of truck songs, "Holocaust Harry's Hotpipe". The tune ignores the gas crunch and wallows is the notion of big powerful monsters beyond whatever the non-custom rigs can do.

"Well I used to drive those regular trucks

before I built this rig

Back in the days when I was broke

Before I made it big

When I sucked dust behind Volvos

And ate it behind vans

Men with Fords and GMCs and even panel vans

When 30,000 kilos was considered a big load

Back in the days when 18 wheelers

were the King Kongs of the road

## Every Truck Lover's Dream:

well that's when I won the Lotto, folks

and achieved my hearts desire,

and I built this big jet powered truck

and put her out for hire.

In the song, the man talks about 2,000 horse power, 3 transmissions and a computerized gear shift to manage it all. It's funny and bouncy and probably a secret dream of every trucker.

A down to earth singer and songwriter, Cyril May and his musical cohort Jack McDonald make having a supertruck like described in this song sound like a really nifty idea.

"Holocaust Harry's Hotpipe" is only one of the great songs on Cyril May and Jack McDonald's CD "Off The Beaten Track". Listen to samples of their tunes on the web site:

## **How To Get Your Kayak From Home To The Water**

**By Niall Barco**

Some people think only about buying their new kayak, not about how to get it from their home to the water. It can be a logistical nightmare transporting a kayak. Thankfully there are many good kayak racks available.

Finding the right system to attach your kayak to your vehicle may be easier than think. Kayak racks are 100 percent dependable and reliable. There are various styles that will fit every truck.

You will find that many kayak truck racks are able to load and carry more than one kayak easily and safely. You can buy such truck racks at any kayak store and will be able to find the precise one that you want. The companies that create these racks have reliable reputations. You won't ever have to worry about your kayak falling off while you are driving.

There are several different rack types. You can mount the rack on a truck roof or in the bed of the vehicle. Either of these options gives you the chance to travel safely with more than one kayak.

These rack systems are relatively easy to install and are quite sturdy after you install them! You do not have to be concerned about installing any of the systems wrong because they are just too easy to install! Anyone can do it and do it quickly.

## Every Truck Lover's Dream:

They not only are easy to install but they are also easy to remove. The only hard work you will have to do is lift the kayak into the vehicle!

Some people feel better about traveling with their kayak in the truck because they think the kayak rack is more durable. In a truck, the system that you install is a little larger and has more to it than a car rack. They are both reliable and safe. Your vehicle of preference is the only difference.

Begin shopping for a truck rack now and get your kayaking adventures under way!
