Free Ebooks Equal Free Money

By Scott Patterson

Do you know the secret to making money with affiliate marketing?

Many smart affiliate marketers earn revenue by creating free special reports (or ebooks) that discuss a specific topic. These guides contain links to high-paying affiliate products. So whenever someone reads a free ebook and purchases product from an affiliate link, the marketer earns a sales commission.

But what if you don't know how to find a topic for your free ebook?

If this is the case, here is a tutorial that will help you get started with your free money-making ebook.

As you probably know, affiliate marketing is one of the best ways to generate revenue from an Internet business. Unfortunately, it is hard to get people to purchase from an affiliate link. Many times, they go to your website and check out your information. Then most of them leave without purchasing products through an affiliate link.

The problem is you haven't had time to explain to them the value of the products you are recommending.

The solution is you can create a guide that discusses a hot topic related to your product. In this report, you discuss the topic and then provide a solution to the major problem that that is experienced by your readers. Obviously the affiliate product will be the solution to their problems.

So how do you write one of these special reports?

In truth, it is very easy to write a 5-15 page special report that is in high demand by readers, while having a potential for a high affiliate income.

The first step is to look for a topic.

Free Ebooks Equal Free Money

One of the best ways to discover a good topic is to explore forums that cater to your niche or product. Then read up on topics that people have posted. Many people will post comments on forums looking for answers to particular problems. All you need to do is find a topic where you can easily create at least five pages of content.

The next step is to find a related affiliate product.

Most of the time, somebody has already created a product that provides a solution to the problem that people are having. All you have to do is look for this product and become an affiliate. The best part is most affiliate programs have marketing material which you can use to help create your content.

After looking at the forum and support material, you can easily create your special report.

In this free ebook, you will discuss the topic in general terms. You will talk about the problem and ways

they can find the solution. Your content will focus on the pain they are experiencing from this problem. Then mention the solution to their problem which is your affiliate product. In your special report, you want to provide useful information while gently persuading the reader to check out your affiliate link.

The key is to talk about the benefits of using the product, without being too pushy or salesy. Most affiliate products have a sales page, so you can leave the convincing to the referral site. As long as you do a good job pre-selling your readers on that particular product, they will arrive at the site ready to buy.

Free ebooks or special reports are a great way to earn long-term affiliate income because they can be easily distributed and provide quality value to the reader. As long as you focus on creating good content for your reader, you will see your affiliate revenue increase.

FREE is the Way to Go

By Gena Biem

Free is such a popular word, not just online, but in life offline as well. People love the idea of getting things for free. I admit, I am one of those people. I spend all of my spare time finding free things on and offline, and then I create free resources for others to use.

I've accumulated hundreds of ebooks and quite a bit of software. I always end up subscribed to new ezines and newsletters because I just can't control myself. If they offer a free report, ebook or software program that I don't have I have no problem signing up.

Free Ebooks Equal Free Money

But even better than the fact that they're free, most of the free items I download are great resources. I have learned quite a bit from reading the ebooks I have. I love when I run across a great tip or trick that I was completely unaware of. The majority of what I've learned about online marketing originated from completely free information.

You should never underestimate the power of free ebooks and reports. Don't assume that just because you don't have to pay for it that it's worthless. Of course, you'll run across an ebook full of affiliate links at times, but it's worth your time to weed through the bad ones to find the ones that actually teach you something valuable.
