Get Perfect Pout With Lip Gloss!

By James C.Cameer

Lip gloss is a cosmetic product used primarily by teenage girls and young women around the globe

to give the lips shine and subtle color. Lip gloss is distributed as a viscous liquid or a soft solid. It can be translucent (clear lip gloss can be layered over regular lipstick for extra shine) or various shades of opacity, including frosted, glittery and metallic looks. The colors are almost limitless!

Lip Glosses are a gift to women who want to correct their lip shape to achieve a truly perfect finish on the face. First, study the natural shape of your lips, identify the defects, if any and decide on what you want to achieve and then proceed. See Below for some great tips!

I Have Small Mouth With Small Lips Small mouth with small lips? Want to achieve fuller lips? No problem! These are easily corrected by taking the lip liner pencil outside the natural lip line. Work slowly and steadily to form a perfect shape. Fill in with primer and finally with the lipstick. A highlight of frosting on the upper lip would also create an impression of fullness.

I Have Large Mouth With Full Lips: Oh! Lucky you! Your lips are the natural envy of all women around! So, how do you work the lip gloss on your lips for a perfect finish? Apply liquid foundation makeup to the entire mouth, then outline with a dark shade of lipstick just inside the natural contours of the mouth. Then apply lipstick of a lighter shade carefully and accurately within this outline. Subdued shades work well for this kind of mouth. Use medium toned lip colours and avoid dark browns, plums, electric brights or pale shimmer shades.

I Have Full Upper Lip Ah, to get a more even, symmetrical appearance, simply apply fluid foundation makeup to the upper lip. Outline just inside its natural contour and apply a dark shade of lipstick. Then outline the lower lip just outside its natural contour and emphasize by filling in with a lighter shade of lipstick.

I Have Full Lower Lip Simply outline upper lip just outside its natural contour. Apply a light shade of lipstick and in the center add a touch of lip gloss. Apply fluid foundation makeup to the lower lip. Outline just inside its natural contour. Then fill in with a darker shade of lipstick, using a lip brush.

I Have Wide Mouth You are a natural talker! Cover the corners of the mouth with foundation makeup or a cover stick. Apply lipstick with a lip brush, stopping a few millimeters before the corners of the mouth are reached.

Lip gloss is so popular due to its ease of application and flirty look. For some young teenagers, it is used as a `starter' make-up. Although the look is mostly associated with youth, multinational companies like Stila and MAC do make lip glosses for high-end consumers.

Some of these glosses contain collagen or other `plumping' agents. Lip gloss is vital to the mod make-up style exemplified by Twiggy, an eyeliner and mascara-heavy look that requires sheer, `dewy' colors elsewhere. It can be paired with well-blended gel or cream blush to achieve this look.

How To Apply Lip Gloss Correctly!

By Darry J.Oswald

What are Lip Glosses? Lip gloss and lip shine comes in tubes and tiny pots that are convenient to use and give a shimmer and shine to your lips that you have always wished for. These days, they are manufactured to last for long periods of time and can be water-resistant too.

Lip Gloss can be applied either over the lipstick or alone for a more natural and nude lip look. Lip-gloss helps to add more volume to your lips and make them look fuller and highlight them on the face. Thus, women with thick lips are generally advised to use it very sparingly. One can effectively make the lips look more beautiful with the help of a little lip gloss and other lip products and use it strategically for lip correction.

A light film of Chapstick over lips not only protect them and heal them but also helps the lip color to set more effectively. Now, not only are lip glosses easy to use, they serve a great purpose too, that is to keep your lips chap free.

Here are some great tips on how to apply your favorite lip gloss to achieve that lustrous, full volume pout!

Right Application of Lip Gloss First thing first, apply your lip gloss on properly. Instead of putting gloss on like you do lipstick (from left to right, top to bottom with a smack!), first apply gloss to the middle of your bottom lip only. Rub lips together. This will keep gloss from going on too thickly and getting goopy on you.

I want to Use Lip Gloss Over Lipstick! If you wish to give your current lip stick color a mood lift, it is a great idea to slide some yummy lip gloss over your applied lip stick. I love the look of just a bit of gloss over a neutral lipstick. Again, dab just a bit in the center of lips and smooth out from there. This method

of smoothing out the lip gloss from the center will help you from applying too the lip gloss on too thickly.

Lip Gloss too Sticky? Did you accidentally apply a little too much gloss? No problem! There is a very simple solution to this. All you do is just to smack your lips between a tissue paper, just like you would lipstick! There you go, all is good to go again!

Lip gloss is as popular as ever! Always have been and always will be! So, what are you waiting for? Get today's latest colors and try them all on!
