Get Your Football Tickets Somehow, Someway

By Christophehr M Luck

As a fan of a very popular and successful professional football team, I know it can be difficult to get tickets, but what if you want to buy Detroit Lions' tickets? In recent history, the Detroit Lions have not been overly successful, but does that make the tickets any cheaper or easier to obtain? I suppose it depends on who sets ticket prices and how often they sell out their stadium, no matter what their record is

. The more I look into it, the more I realize that the best

prices on about anything can be found online, and Detroit Lions' tickets, or any NFL tickets for that matter, are no exception. All you need to do then, is understand the step by step process of buying Detroit Lions' tickets online to get the best price possible.

The first couple of steps may seem obvious, but it is important that you are prepared when to make your Detroit Lions ticket purchase. First of all, you will need to figure out which game you want to attend. Is there a particular opponent you want to see? If not, you can just check all games and see where there is availability. Many games for a number of NFL teams are sold out before the season even begins, due to the enormous popularity of pro football

.

However, just in case, go online to the Detroit Lions' official website and check to see if there are tickets available for the game you want to see. If so, you are in luck, the team will be selling the tickets at face value, which is really as low as you can expect to get them for unless you are buying an enormous quantity of Detroit Lions' tickets.

If you are planning a season or more ahead to buy your Detroit Lions' tickets, you may want to join the team's waitlist of fan club. You will then, likely get access tickets on a preferential basis. In addition, you will likely have a great shot at playoff tickets if that is something that becomes an issue during the season. Because no matter which game you want to go to, Detroit Lions' tickets for the playoffs sure would make for a good time.

Another option is to buy your Detroit Lions' tickets from a ticket broker. Brokering is illegal in some states, but rarely prosecuted. If you are concerned, however, just check with your local and state laws to make sure everything you do is on the up and up. A broker will buy up tickets to sold-out events and resell them for a profit. Your Detroit Lions' tickets won't be cheap going this route, but you are likely to get tickets to whatever event you would like to go to. If you want to bottom feed a little bit more, there are always ticket scalpers around on game day

. They basically do

what brokers do, only without the office. If you are the type who likes to wheel a deal and doesn't mind gambling a bit, you can certainly do all of those things if you get your Detroit Lions' tickets from a ticket scalper.

Tickets for any NFL team, yes even the Detroit Lions, are difficult to get sometimes. However, if you plan out which game you want to see, getting the Detroit Lions' tickets you want is not difficult. You may have to spend some money, but if you get to see the game you want, isn't it worth it?

The Cool Thing About Fantasy Football

By Chris Hinde

Everyone loves fantasy football and get very excited for the fantasy drafts. But, have you ever really thought about why? I mean, beyond the obvious.

Fantasy football is really the only place or way for you, an average person, to create a football team

that you have control over. You choose which football player starts, and who is on the bench. You get to draft whatever players you want to your team based on their real life performance record. The really cool thing? Well, you don't have to worry about anything else. You don't have to deal with any money issues except for salary cap. That's it. You don't have to worry about how much money the fans are pulling in by purchasing tickets to your stadium, nor do you have to worry about purchasing the football equipment, such as football helmets like these:

that your team

will be using. Now, that my friends...is very cool indeed.

So you basically have free reign of a team of great football players (if you've done your homework), and now can decide who plays when. Obviously, it is not as in depth as Madden Football, but this is more of a player game. Meaning, you choose your players based on their record in the NFL and create your team and score your points that way instead of making plays, you are making a team.

Now, my question is: What about college football? The enormous fan base across the US would make fantasy college football a huge presence in the sports world. Sure, it would be a lot harder to predict what players to pick because although they are way better than I would ever be at football, they are not always as consistent as most NFL players are. Especially when you are drafting your defense. But, just imagine how much more varied and exciting the world of fantasy football would be if you could create your own college team too.

You could go off of the "experts" top college football picks, starting with the team and working your way down. Just think of the huge potential talent that is stuffed away at big 10 colleges because they've already got their star quarterback or wide receiver. This would give little known players a chance to get their name out there before even completing college. You could help them kick start their career!
