Getting A GED

By John Daye

A Graduate Equivalency Diploma (GED) is a certification for people who have not yet completed high school. The GED is considered a high school equivalency exam.

If you've only recently dropped out of 11th or 12th grade and the subjects are still fresh in your mind, you may take the GED without a lot of advance preparation. Otherwise, you need to study and prepare yourself with help from the following:

1. Locate a GED Prep course at a school or training facility near you by contacting any public high school or college guidance counselor. For more help, reach out to the GED hotline at 1-800-626-9433.
2. Head to a local or online bookstore or the public library for GED Prep books to study at home.
3. Search your favorite search engine and find online GED study courses. They generally require payment.
4. Check your local and cable television listings got GED study courses. You can call: 1-800-354-9067 for help with this.

About the GED Test

The test covers basic reading and understanding fundamentals as well as math, science and social studies. It covers the following areas:

Writing – Grammar, punctuation, spelling, sentence structure; with multiple-choice questions and a 200-word story to write.

Math – decimals, fractions, percentages and basic math problems; multiple-choice problems where you need to add, subtract, multiply and divide without using a calculator.

Social Studies – Geography using maps and charts, history; with 66 multiple-choice questions.

Getting A GED

Science – biology, chemistry, earth and physical sciences; with multiple-choice questions.

Literature and the Arts: Reading and comprehension; with multiple-choice questions.

The test lasts roughly 7 hours and 35 minutes. Ask in your state if you can:

– take the test in parts – retake the test if you fail (and if so, the costs involved and time needed to wait to re-test)

Getting your GED is an important step in your career and your education. Make the time to look into getting your GED now!

Engineering Degrees Online - Becoming a Pro From Home

By Nelson Widrow

So, your hectic schedule prevents you from spending all day on campus and streaking through the quad during the night. Well, that's unfortunate, however it certainly doesn't have to preclude you from following your dream of beginning or continuing your engineering education and career. Nowadays, the unbelievable plethora of online engineering degrees available, for every level of study, there's a perfect fit to meet anyone's demands.

If your experience and history has gone as far as graduating high school, or even attaining your GED, starting off with an associate degree. You can still specialize in whichever forms of engineering matches your interests and abilities. With the online engineering degree, there's: civil, electrical, mechanical, environmental engineering and more. You're able to gain the know-how and practical experience that you need to get started working in your field. And the rigidity of the schedule is up to you. If you absolutely overwhelmed at your job, take longer. If you feel like you can handle a bigger load of class credits, take on what you can. With online courses, you make the schedule. You can study online or with books at your convenience, a combination of the two, anything but come in to the classroom when it doesn't fit into your schedule.

But online engineering degrees certainly don't stop with associate degrees, your undergrad and graduate degrees are within your reach if that's the level of education that you are ready to start, that's fine. Just imagine, not having an interruption in your work and being able to present a potential employer with your masters degree in just a couple years. The future is up to, as is the university schedule, when you utilize the benefits of online engineering degrees.

Nelson Widrow is an author who's written multiple articles about online degrees. Read more of his articles including:
