## Gods 401k plan

By John Anhalt

### Gods 401k plan by John Anhalt

As the starving slaves tend away at their cubicle farms, multi-national companies get fat on consumer desires. Investors fortify their crops for the season ahead garnering internal nutrients from CEO's to assure their successful growth. Wait a minute, who is really benefiting from this? Only about five percent of the world population is according to recent studies. The rest of us are left fighting for scraps from the new harvest each year.

"Look Kobe, those silly earthlings are fighting again over those shiny yellow rocks and green paper", the extra-terrestrial Jessie Jack said observing the earth from his flying saucer. "I think they really like those gold chains", Kobe responded. Seems silly, but somehow as a society, we've accepted that people will kill and be killed for those shiny rocks. Of course they don't kill just for the rock, but what the rock represents, power. Like any good basketball player asking for the ball will tell you, "Will you give up the rock already?"

The framers of the U.S. constitution realized while creating our federal government, too much power by any one person or faction, leads to the misery of the many. This lesson, learned under the British rule, required several years of wars, and many lives to be lost. How many times must we forget our history? The model hasn't changed. Why do we continue to forget our past mistakes? Well it's simple, yet complex of course. We desire change, but we know it comes at a great cost.

Our current course is creating an unbelievable consolidation of wealth on this planet. Corporations continue to increase the size of their pie with merger after merger, while workers are left asking, "Where's our piece?" The average salary of a CEO in America since the 1980's has increased by nearly 1900%, while the average worker salary has increased only 74%. How can we allow this to

continue? Corporations are continuing to increase profits, even during times of recession, yet there are less jobs because companies are squeezing more productivity out of their employees, thus they have no need to hire more people.

Now we have a political party who is pushing to take away social security. Excuse my sarcasm, but I'm fairly certain this isn't going to benefit the working class. We cannot, as a society, allow this to happen. This will only continue to increase an already widening gap between social classes in America.

If we could only sit these power mongering, money hording, nice individuals down and ask them, "You've spent your whole life acquiring green paper with little or no respect for your fellow brother and world. What the heck are you going to do with all this money you've been amassing all your life once you die?" I have a strong feeling they're hoping God has a good 401k plan.

Philosopher and writer.

### **401k Retirement Plans Explained**

**By Stu Pearson**

401k retirement plans are special types of accounts, financed through pre-tax payroll deductions. The funds in your account are invested in various ways. Your funds can be invested through any number of stocks, mutual funds, and other ways, and it is not taxed on any capital gains or interest until the money is pulled out or withdrawn. Congress approved this retirement savings plan in 1981, and its name was rooted from the section of the Internal Revenue Code that contains it, which is obviously, section 401k. One great advantage of this retirement plan is that the tax treatment is complimentary. Moreover, capital gains, interest and dividends are not levied until they are pulled out or withdrawn.

In terms of its investment customization and flexibility, 401k retirement plans offer employees and workers an extensive array of options and preferences as to how their property and assets are invested through time. Moreover, many businesses and companies permit employees to obtain company stock for their 401k retirement plan at a cut rate. However, many pecuniary consultants and counselors are not in favor of holding a significant percentage of your 401k plan in the shares of your boss or manager.

So what are 401k plans? If you are like most people, you probably have questions about your 401k retirement plan. You may be wondering how a 401k actually takes place, precisely what a 401k retirement plan is, or how you can be capable of stimulating the diminishing balance in your 401k plan. So how does a 401k plan actually work? If your company offers a 401k retirement plan, you can agree to join. You can also have the selection option of choosing the amount of funds you wish to put in from an inventory of funds presented in the 401k plan. Your payment will routinely be deducted from your pay check before taxes.

Every worker can invest up to a defined proportion of his wage into a 401k plan. Your involvement, along with any coordinated contributions from your employer, are then endowed into your chosen funds. These funds will produce interest before being taxed, and can be withdrawn when you reach 60

years of age. At this point in time, you must pay the income tax on the withdrawn funds. Furthermore, there are methods and means wherein you can pull out your funds before age 60. However, these early withdrawals frequently call for a penalty in conjunction with the payment of taxes.

A 401k retirement plan is an employer–subsidized retirement plan, and it is categorized into two groups: defined benefit and defined contribution. With this defined benefit plan, the employer pledges to give a distinct sum to those who want to retire and those who meet specified eligibility standards and measures.
