**Hair Replacement Services - Things You Need To Know**

**By Oliver Turner**

Hair replacement is turning more popular these years especially among people suffering from

severe hair loss problem. Because of advanced medical technology and a high success rate of hair replacement its cost has become more reasonable and its results has come out with less complications. If you are planning for hair replacement, please keep in mind the following tips:

1. The first hair replacement surgery was performed over 30 years ago. Therefore, it is not new now.
2. During the process of hair replacement, specialists only take your existing hair. That is why if you wish for a hair replacement you must have some hair in good condition at the back and sides of your head. This area is known as "The donor area."
3. If you have lost almost all your hair then no hair replacement center could help you. You have to meet the ratio of minimum hair present in your head to be eligible for a hair transplant.
4. Hair replacement surgery is almost with out side effects and safe. However, in rare instances there could be infections during the surgical procedure.
5. Hair replacement surgery is generally performed under local anesthesia; you will not feel any pain or trouble.

Permanent hair replacement is a long process; it may need one to five sessions, with an interval of two to four months between them. The entire procedure can take 24 to 30 months.

Your physician might restrict you from sporting activities after each hair replacement session. Follow all medical recommendations.

Be confirmed that your surgeon has executed a lot of hair replacement processes successfully and has an experience in the application of all modern techniques.

## Hair Replacement Services – Things You Need To Know

Permanent hair replacement is a completely individual process and you must ask your specialist how your hair will look after the hair replacement process.

Hair replacement is a final solution to the problem of hair loss. However the result of permanent hair replacement varies from person to person so you have to take the risk of trying your luck out.

### **Hair Replacement - 10 Things You Need To Know When Considering A Hair Replacement**

**By Paton Jackson**

Hair replacement is becoming more and more popular in the recent years among people who suffer from hair loss. Due to the advance of medical technology, hair replacement became more common - its prices got more reasonable and its outcome got better.

If you consider having a hair replacement, read the following first:

1. Permanent hair transplant surgery is not new. Actually, the first hair transplant surgery was held over 30 years ago.
2. Hair replacement transplant uses only your existing hair. That's why in order to get a hair replacement transplant you must have hair in good condition at the sides and at the back of your head ("The donor areas")
3. If you have almost no hair left over your head, hair replacement could not help you. There are different techniques of hair replacement transplant according to the ratio of hair fullness required.
4. Hair replacement is not only for men - It could be a good solution for female hair loss in some cases.
5. Hair replacement surgery is usually safe and has no side effects. However, in some cases there could be infections like any surgery.
6. Hair replacement surgery is normally performed using a local anesthesia; you should little or no pain at all.

## Hair Replacement Services – Things You Need To Know

7. Hair replacement process requires several sessions with an interval of a couple of months between them. All the process can take up to two years.
8. You will be asked to refrain of any sport activity after each hair replacement session.
9. Make sure that your physician has performed a lot of hair replacement processes and that he knows and has an experience using all the different techniques.
10. Hair replacement is a completely individual process. You must ask the physician how your hair will look after the process.

Hair replacement is a legitimate hair loss solution. However, it is an extreme one. We strongly advice you try other hair loss solution before trying this one.
