MAKE A MILLION \$ PER MONTH.

No work involved.

Do it whilst sitting on the beach at Maliboo.

This may sound a bit extreme but how many adverts have you seen that are similar to it?

The trouble is that so many newcomers to the internet get taken in by this sort of hype. No wonder that so many get disillusioned and wrap up and go away never to return.

It is a real pity that this sort of thing is allowed to happen. If only people would tell the truth they would get a far better response to their adverts.

Tell it as it is.

With the right information and a little incentive it is possible to start a business working from home, using nothing more than a desktop computer and something to sell.

Starting a business is easy. Earning money from it is a different thing. It takes a lot of dedication and hard work.

Just a minute!

What do we mean by 'hard work'?

Sitting at a keyboard for a couple of hours a day does not sound like hard work to those who are used to physical effort.

Never-the-less, If the typing was all that was required it would be a doddle.

There is more to it than that.

For instance:

Devising an advertising strategy takes a certain amount of expertise. That is something that the

Hard work!

average Jack or Jill needs to learn, either the hard way from experience, or the much easier way by asking the right questions from the right people.

What a lot of newcomers do not understand is that whatever they need to know, there is someone out there who is willing to give them the answers.

Willing to take them by the hand and guide them on the path to success.

That is something that you don't get in normal business circles.

There are thousands of websites out there offering genuine help to those who need it. A lot of them have an ulterior motive, they have something to sell but that does not mean that the advice that they

give is not useful. Would you buy from someone who gave you poor advice?

If they give advice that you can trust, perhaps you will trust them enough to purchase something from them at a later date. That is quite ethical.

Always remember: If something seems too good to be true, you can bet your boots that it is.

Most of the con artists are pretty obvious, but make sure that you keep your ears and eyes open at all times.

Enjoy your work and make a lot of money. You can do it if you try.

All the best in your endeavours.

Bob.

**You are being noticed... by Harish Dhingra**

Do you think that you are not being noticed?? If your answer is "Yes" then you are absolutely wrong...

Just don't ever think like this because you are always being noticed...

## Hard work!

It may be possible that you are working hard but not getting rewards for it right now but it does not mean that you are not being noticed. It may be a bit late for you to get the rewards but you will definitely get the rewards.

You have so many reasons to work hard and not think negative even if you are not paid extra for it.

1. It doesn't affect your health to work hard.
2. You are being noticed for your every work.
3. You do not become lazy.
4. You make a habit to work honestly.
5. It gives you satisfaction.
6. You will be the last in case of lay off.
7. You improve your knowledge.
8. You increase your chances of promotion.
9. You are just ready to work anytime when your colleagues are tired.

So don't think it again that you are not being noticed because your work speaks for you.
