Hassle-Free Moving With Robot Lawn Mowers

By Jonathan Brunet

After being introduced to the highly innovative and ingenious home robots from the iRobot

company, the Roomba and Scooba home robot models that will cater to your indoor cleaning needs, now comes RoboMower which, like its present companions in the domestic robots department, is also causing quite a stir with its aim to liberate people from doing the same old boring routine of mowing the lawn. A robot lawn mower, sounds great right? Wait till you hear more about this widely popular robot lawn mower.

What can the RoboMower, robot lawn mower do that is so impressive?

*This robot lawn mower can automatically cut your lawn grass.

*You won't have to do the tedious task of collecting the lawn clippings after its finished mowing the lawn.

*Unlike most lawn mowers, this crafty robot lawn mower is actually very quiet while it does its magic, you can practically hear a pin drop.

*You won't need to worry about gas, oil or emissions when it comes to this highly efficient home robot.

*It doesn't take a rocket scientist in order for one to be able to operate it. This robot lawn mower is extremely user friendly.

*Even if you have young children, you won't need to worry about this robot lawn mower hurting your kids, it has features designed for safety.

*This robot lawn mower can take on almost any kind of job as it is designed to mow domestic lawns of any size and shape.

Having a robot lawn mower around is actually the most convenient way for one to be able to maintain a healthy looking lawn. And with not much work from you since automatic robot lawn mowers are

Hassle-Free Moving With Robot Lawn Mowers

designed to help you save a lot of time and effort when it comes to the upkeep of your lawn. You may even mow your lawn anytime of the day without the worry of disturbing your neighbours. Thus, you'll end up having more free time for yourself as well as for your family. You can practically have the luxury of having the weekend to yourself.

Another great convenience from having a robot lawn mower is its many safety features that enable it to identify trees, rocks as well as other obstacles. You won't need to worry about it bumping over anything. It has specially equipped bumpers to avoid scratches, a mower lift detection so that you'll not cut yourself with, child lock - safe from curious little children, plus a whole lot more. In order to keep your lawn looking healthy, a robot lawn mower, as a matter of fact actually uses the cutting method because it has been proven to be much more beneficial for grass. The robot lawn mower also has the edge-mode feature wherein you can assign it to just cut along the edge of your lawn in order to maintain its beauty.

Very environmentally friendly, the robot lawn mower doesn't need gas nor oil and has no emissions, it even actually helps retain your lawn's valuable nutrients. There are actually many models of robot lawn mowers at RobotShop.ca, the Robomower RL850 which is said to be suitable for a lot size of up to 1/3 of an acre while other robot lawn mower models are the Robomower RL1000 and Zuchetti Ambrogio Evolution.

Considered to be the top of the line robot lawn mower available, the Ambrogio Evolution is actually suitable for even up to 3/4 acre lot size of lawn, but it still provides for complete automation of the whole mowing process. You can actually set a weekly program of when and at what time you would want the robot lawn mower to go to work. As soon as its done with its work, it will conveniently go back to its charging station wherein it will recharge its batteries in order to be ready for its next scheduled task.

For a Robot Lawn Mower, robot vacuums, such as the IRobot Roomba and Scooba floor cleaner, robot toys, robot kits and construction kits, such as lego mindstorms 2.0, please visit

Easy Working With Cordless Lawn Mowers

By A.Caxton

Description on cordless electric lawnmowers. Have you got any question on cordless lawn mowers?, just read this article and you will learn the bases on these new innovative lawnmowers.

Most cordless electric lawnmowers have ups and downs on the mowers market. It is due to these specific lawn mowers have experienced so many breakdowns in the last years. Customers are dissatisfied upon electric lawnmowers even though the idea is really brilliant. Several companies

Hassle-Free Moving With Robot Lawn Mowers

invested in making cordless lawnmowers such as Ryobi, Black & Decker and Toro manufacturers . But they have discontinued manufacturing those models because of slow demand.

Most electric work with 24V NiCad lawnmower batteries. They are able to keep working between 1 up to 2 hours for specific models. The main advantage of cordless, is that we don't have to deal with the hassle of dragging around an extension cord. This becomes a big problem when we work on relative big yards. Therefore, they performs properly on the field without cords.

On the other hand, there exists similar but at the mean time much more different lawn mowers, corded electric lawnmowers. They are actually less expensive than cordless electric lawnmowers due to the battery is missed. They are plugged in at all time, this is the most important disadvantage. We have to deal with the cord, trying to drag it around.

Robotic and electric lawn mowers

Nowadays, innovative lawn mowers are being designed by leading electric lawn mowers manufacturers. Robotic lawnmowers, are basically cordless mowers. We can leave them alone over the grass and by just setting up a positional system, the robot will mow the grass while we are watching TV, isn't it perfect?All in all, we don't recommend in buying these lawnmowers, even though they are on the market, we think that they still are just prototypes.

A. Caxton contributes adding reviews and special articles regularly to
