**By Ryan Bombard**

The Alan Mann Helicopters Flying Training Organization (AMH FTO), located at Fair Oaks Airport is a registered CAA/JAA training facility offering a wide range of flying instruction on single and twin engine helicopters. Basic PPL instruction with minimum cost and safe handling is undertaken on Bell 47 (Piston engine helicopter) and Bell 206 Jet Ranger. Bell 407 or AS350 Squirrel is used for turbine engine experience.

Helicopter Services, Inc.

- General Information. Training and examinations for type conversions, night qualification and instrument ratings are undertaken on the Bell 206, Bell 407, AS350 and A109 series helicopters. A team of experienced, full time conducts it, salaried instructors who ensure a comprehensive, informative and enjoyable training program.
- Payment. They accept Amex, Visa and MasterCard. Option of SLM Corp for educational financial assistance with flexible repayment terms is available; Pilot Finance, Inc provides flight training loans to train veterans.
- Facilities. A 20,000sq ft hangar facility provides for many 'pre' and 'post' flight briefings and other audio-visual classroom training aids.
- Aircraft. Basic training is performed in latest, light, piston engine Robinson R22 Beta II Series Helicopter. These are highly reliable, extensively used in USA and worldwide by civilian commercial, local and government agencies. The R44 Raven stable, inexpensive turbine aircraft is used for commercial operation training. The Bell 206 III advanced helicopter is used for transport pilot training, instrument courses and turbine transitions. Any other specific helicopter training can be arranged for if you call in advance.

Instruction Courses:

## Helicopter Schools And Courses

1. Private Pilot License course. This course will provide commercial rotocraft certificate. Age 17 years +, must be able to read, speak and understand English. FAA approved medical examiner's third class medical certificate is a must. FAA requires 40 hours of flight time for passing.
2. Commercial Pilot License. This can be obtained if age is 18 years +, able to speak, read and understand English. FAA approved aviation medical examiner's class two medical certificates are essential. FAA minimum: 150 hours of flying time (100 hours in powered aircraft and 50 hours in helicopter). 35 hours of additional flying time in PIC helicopter will add-on to the course.
3. Airline Transport Pilot. This course utilizes IFR equipped Bell 206 LIII Long ranger.
4. Instrument Training. Professional pilots must have instrument ratings. This training is conducted on Robinson R22BII, R44 Raven and Bell Long Ranger. Private helicopter license, 50 hours of cross-country flight time as pilot in command and 40 hours actual or simulated instrumental training (15 Hours must in helicopter) is a prerequisites for the certificate.
5. Turbine transition. Certificate provided in 15 flying hours (Dual 5 hours plus classroom 10 hours) on Bell 206 L-III training. Package price is \$5500.00 USD.

### **How to Solve Disputes with the Helicopter Talk Technique**

**By Peter Murphy**

Do you ever find that when a friend asks for your opinion on a problem it is a lot easier for you to see a solution than it is for your friend?

And do you also find that sometimes you feel completely stuck when it comes to your own problems?

The same applies to disputes, relationship issues and disagreements.

When you are part of the problem it can be very difficult to see a solution. What you need at times like this is a helicopter!

Helicopter Talk Technique:

1. Imagine you are in a helicopter flying high above the town you live in. Now travel to where you last

## Helicopter Schools And Courses

had a dispute with a family member, friend or work mate.

2. From the safety and distance of the helicopter above rerun the last conversation when the trouble flared up. Watch the scene unfold and pay attention to how you communicated rather than who was in the right.

3. Ask yourself: how could you have handled the situation better? what could you have done differently? what is the solution to the problem?

Your goal is to be emotionally detached yet concerned with finding the best solution in the same way you help a friend with a problem.

4. Imagine a trusted friend is in the helicopter observing: what advice would your friend give you? what does your friend notice that you missed?

Your own private helicopter can be used to identify patterns of communication you have that land you in hot water as well as new ways of dealing with problems.

Have fun in the sky!
