The Best Sunless Tanning Methods

By Paton Jackson

If you haven't noticed the summer is already here. Surprisingly, you don't have to wait for the summer for endless beach hours beating down on the sun rays. Sunless tanning also known as the indoor tanning is more popular and easy than ever and it is much safer than sun tanning. Here are 10 tips for sunless tanning:

1. Airbrush tanning - Airbrush tanning is a new an emerging sunless tanning method. Using a clear liquid containing called dihydroxyacetone (DHA), you can get a golden tanned look for five to ten days. The ingredients of the airbrush tanning lotion are FDA approved and are considered safer than commercial tanning beds.

2. Tanning beds - Tanning beds and tanning booths actually imitate the sun. Tanning bed lamps use UV-B and UV-C rays to achieve the optimal tanning results. However, tanning bed lamps do not use UV-A rays which are considered harmful.

You will feel the tanning beds results after a couple of weeks.

You may go to a professional tanning salon and get the golden look at one of the commercial tanning beds (Wolff tanning beds are the best ones) or get your own home tanning bed. You can get a discount tanning bed in one the wholesale home tanning beds shops. Yet, you must realize that maintaining a

Home Tanning Beds

tanning bed is an expensive task - you will have to purchase tanning bed products like tanning bed lotions and tanning bed bulbs.

3. Tanning lotions - There is a wide variety of sunless tanning lotions. They are definitely the cheapest sunless tanning method. Nothing is easier than buying discount tanning lotions. However. Most of them have uncertain efficiency. In most cases, the tanning lotions are made of vitamins, minerals and herbal ingredients.

You may choose either one of the above sunless tanning methods. There is no reason for sun tanning nowadays. It takes too long and it is too risky.
