**Hope**

**By Timothy L. Drobnick Sr.**

**Hope by Timothy L. Drobnick Sr.**

Hope is a powerful emotion.

Hope can get you through those days the boss is screaming at you.

Hope keeps you humming while you are walking down the road because your car ran out of that last 50 cents worth of gasoline.

Hope keeps you in a good mood when the other person got the promotion, or the raise that you really did deserve.

Hope provides an inner warmth when you are in the cold scraping ice off your windows to get to work.

Hope provides a smile, even when only a dollar is left after paying the essential bills, and the kids want to go to McDonalds.

Hope gives you a spring in your step as you work at the job that promised long lasting rewards, but only delivered a lifetime of bondage.

Hope takes you into a blissful state, when you feel the 4 walls closing in from the house that has held you captive with domestic duties.

Hope is a healthy drug, provided by our creator(s) that provides relief from physical, mental, and spiritual pain.

## Hope

Hope is a comforter, when the love of your life leaves you.

I have experienced all of these situations, as have most of you. But the hope I held for my future helped to bring me through them. I want to help you have hope, this magical ingredient of life.

I will not provide promises of instant wealth and independence, because I cannot provide that. I know that you receive many offers of business opportunities that promise overnight riches. But even if that were true, I

do not believe it is natural and good.

Studies have shown that 90% of all persons that come into immediate wealth are worse off financially, emotionally, and mentally after 5 years than before they received the wealth. Why do you suppose this is?

I believe that nature must teach us self-discipline, self-respect, respect of other persons, respect of power, and many other things before we are given the responsibility of wealth or independence. I have read dozens and dozens of biographies and autobiographies of successful persons, and I have learned that those that were happy and healthy with their wealth, obtained it over a period of time, not instantly.

They provided a product or service that was worth more than the money they were charging, and they believed that what they were doing was for the good of society. The main motivation was not money, but what they would be able to do to help, improve, build, and solve problems.

Because of the experiences they had building their business they learned important character qualities that were necessary to handle wealth as it came naturally. The hard lessons were a blessing in the long run, preparation for greater responsibilities.

But the wealth that was provided almost instantly, was hope for the future. Hope for a better living. Hope for recognition. Hope for love. Hope for many things important to them.

## Hope

Any business that has sound principals can provide hope. P.E.E.L. is not the only one that will do that. But it is my dream to provide hope for you, starting today!

We are building a business on basic sound business strategies. Demand for our product which creates customers supply of our product that creates profits, good will of the customer, fair compensation to distributors, a product that is worth more than the money we charge for it, friendship among our distributors and customers, motivation to provide more to society than we take from it.

We are not building overnight get rich quick success fantasies, also a drug to the mind but a destructive one. The hope for quick riches takes away motivation and the ability to use your resources to be productive. In order

to fit into the big picture, a good long lasting business must be producing a product or service that is needed by society. If you have not reason to do this, your chances of success are very small.

But let me clarify success. Success is really not an object to be obtained, but it is the person you become and are. Actually, you are successful the day you decide to follow your dreams, and take action to do it. Once you have started your journey, you are enjoying success. Success includes the learning and self improvement process of obtaining a goal, the improvement of your character as you work to obtain your goal, the hope you have and the good service and products you provide in your process of obtaining your goal.

There is one reward of success that is given to you the first day you start your journey towards obtaining your goal, and that is the wonderful emotion of hope. This gift of nature is yours from the moment you decide to start your journey.

### POINTS OF HOPE:

I would like to help provide hope through the opportunities I can offer with P.E.E.L.

1. We have a product that has a demand, this creates hope because you know that a fair exchange of money will take

place.

2. We have a philosophy that many people support, and the good will you receive from your customers because of this provides hope that customers will continue to purchase from you, and bring their friends to you also.

3. We allow a generous profit margin that provides hope of profits.

5. We want to make a difference, and this provides the hope that the world will be a better place because you were here.

Starting your P.E.E.L. ISP business will reward you with hope the first day you start because you understand these points of hope, and believe in them. You believe in them because they are philosophies and techniques that are true and proven over the eons of time.

Hope is one of the great rewards I hope to provide to you.

Look around you. This is your world. You can start making it into the world you want. Your hope starts now.

Your friend,  
Tim

Owner of P.E.E.L. Inc., has helped over 500 people set up their own local ISP business. Tim's information is published on Audio Cds and teaches at local seminars. You can get more information at [FreeSeminar.biz](http://FreeSeminar.biz)

### **Beyond Hope is Faith**

**By Jean R. Charles**

#### **Beyond Hope is Faith by Jean R. Charles**

I live in a small town named after its Dutch settler, whose name is long and difficult to spell and pronounce. The town just to its south is named Hope, and is well known because of its restored historical status. So, when residents of our town are asked where they live their frequent response is "I live beyond Hope".

Recently, as I was driving home beyond Hope, I began thinking about what it really means to live

## Hope

beyond hope. Hope is about wishing for something to occur in the future. It implies uncertainty and longing. You want something and do not know if you will get it.

Beyond this future oriented wishful thinking is faith. Faith implies a knowing. It involves trusting the universe to provide. When you live in faith you intuitively know that things will happen as they are meant to happen. You realize you are where you are and have what you have for a reason. You are satisfied not knowing the answers to the why questions.

Hope is a beautiful little town and a great place to live. However, spiritually, living beyond hope, living in faith is more rewarding and peaceful. Perhaps we should consider changing the name of our town to Faith. This would fit well with the beyond Hope thing, and also with our other neighboring towns of Harmony and Tranquility, but those are other stories.

"Faith sees the invisible, feels the intangible and achieves the impossible." Anonymous.
