## How To Picking The Right Contact Lenses

By Burt Cotton

People today have access to a lot more information than was possible 10–15 years ago. This is

because doctors today are more open with their patients and are ready to discuss and explain whatever doubts or information the patient seeks. The Internet also added wings to information dissemination; today you can find the answer to any question you have whether it is academic, medical, or just trivial.

### The Basics

Picking the right contact lens is not really a deal. First of all, you should know the basics. Contact lenses are actually a good and extremely comfortable way to remove glasses from your eyewear repertoire. These are in fact lenses that are worn over the eyeball either to improve vision, or to improve looks. Either way, they are totally invaluable since they are light, almost invisible and quite reasonable in cost.

### Correct Your Eye Sight

Before you decide on picking the right contact lens, you will need to consult a doctor. He/she will be able to check your eye-sight and give the right power number that is needed for your eye sight to be normal.

Many people take a shortcut and consult the optometrist for getting their eyes tested. While this is not an altogether wrong procedure, it is always better to check your sight with an ophthalmologist, who is a registered medical practitioner. This is not only a safe way to find out if you have any deficiency in your eye sight or not, but also a way to insure that the right treatment is available if you run into any complications after you shift to contact lenses.

### Making Your Choice

You have a choice among contact lenses such as hard lenses, semi-soft lenses and also bandaged lenses. All of these are prescribed to correct eye sight. Your choice would be based upon comfort and

cost. Most people feel that it is best to start wearing eye contacts with semi-soft lenses since these are the best for new users. However, picking the right contact lens is dependent upon both your budget as well as need.

Before making your decision, you will have to read the reviews of the best contact lens available on the market as well as their contradictions over the net. Once you have all the information that is required, picking the right contact lens will be a walk in the park.

### **Contact Lenses: See The World Through Different Lenses**

**By Barney Garcia**

Contact lenses are for those who wouldn't dream of spoiling their looks with glasses and who still need a seeing aide. Contact lenses are a very inexpensive option prescribed by most opticians for their clients. Although almost anyone can wear a contact lens, there are a few individuals whose eyes cannot adjust to contact lenses. It is recommended that a good eye doctor be consulted before you begin using contact lenses on your eyes.

Contact Lenses - To Wear Or Not To Wear Contact lenses may have shown us the way out of the good "old" glasses, but it is highly recommended that contact lenses be used only after consulting an eye specialist or optician. Wearing contact lenses at all times may cause harm to your eye. Also it is important to know the right way to wear your contact lenses. Continuous wear is not advisable and there are ongoing debates about whether one can wear contact lenses to sleep. Still, contact lenses are quite the rage among office workers as well as those from the fashion world such as models and stars.

Colored Contact Lenses Some of us have been endowed with uniquely colored eyes, while for some; colored eyes can enhance the attractiveness and charm of an individual. Colored contact lenses are available for those who would like the world to show a different side to them whenever they choose. Hazel, brown, blue, grey, green and even hard-to-find colors like purple or yellow is not unlikely colors for contact lenses worn by people in today's modern and fashionable world. Many contact lens manufacturers also make colored contact lenses to cater to this rapidly growing clientele of contact lens users.

Disposable Contact Lenses Many manufacturers of contact lenses have come up with disposable contact lenses. These lenses can be thrown away after use and do not carry the risks of infection or other side effects of normal contact lenses. Disposable contact lenses may be an expensive option, but they have been in great demand for quite some time among those who are constantly traveling or are exposed to various hazardous substances. It is easier for them to throw away used contact lenses than to face infections or other eye-related problems because of unclean contact lenses.
