How To Succeed with Safelists

By Bob Mobino

How To Succeed with Safelists by Bob Mobino

It's a statistically verified fact that most entrepreneurs are doomed to fail with Safelists.

You see, most marketers fail to target their ads with scientific precision.

It really doesn't matter how well-crafted your ads are when it comes to promoting products or programs in Safelists... what will *really* makes a difference to profiting from Safelists, is targeting your ads with the following variables:

=> Target your Ads *according* to the "psychographic" data of Safelist-Members.

=> Endorse a Program with an Awe-Inspiring Sales Letter!
[that's the most important part of your promotions.]

=> Periodically, purchase "Premium Sponsorship" to stand-out from your competition and instil more TRUST!

=> Use Safelists that have the strictest rules and have a solid record of being in business for at least 7 months.

=> Offer a FREE Bonus that is worth at least \$27 in Retail Value (a digital product, software, or script.)

=> Structure your ad to appear legitimate, meaningful and "seductive"!

=> Test various Safelists to see which are the most "responsive", so you can stay-afloat with the profitable ones...

I have wasted two full years testing Safelists with religious persistence; but it finally paid-off BIG TIME!

How To Succeed with Safelists

The long-awaited outcome to succeeding with Safelists is mostly *what* program you endorse... having personally tested over 60 money making programs, I finally discovered an implausible MLM SYSTEM that outperforms any other promising program by at least 22:1 – never fail to remember that the offer far outperforms any other element, especially with Safelists.

Want to 'see' which program?

~~~~~

See how to...

"Turn Safelists into A Steady  
Income, with the \*Right\* Offer."

<http://close-sale.com/safelist.htm>

~~~~~

Once you 'trigger' the mechanics of promoting your ads via "responsive Safelists" with the "RIGHT OFFER", sit back, relax and... watch your Bank Account engorging momentarily!

How To Make Safelists Work For You

By Nathan Brown

Since I own Safelist Training 101 people often ask me questions like, "Do safelists work?" "Can you really make money using safelists?"

The answer is yes, BUT you have to use safelists correctly. This is important because most safelist users are using safelist incorrectly. They get horrible results, and after a while they blame their results on the safelists. They never realize that if they changed their tactics, they would change their results.

To make sure you are using safelist correctly you need to educate yourself about safelist marketing before you go any further.

First you need to understand the basics about safelists. You need to be able to answer the following questions: What are safelists? How do safelists work? What kinds of safelists are there? What are you allowed to do with safelists and what is not permitted? What is the difference between a free and a paid safelist? How can you tell which safelists are worth joining?

Once you understand the basics of safelist marketing, you need to learn how to get great results from

How To Succeed with Safelists

safelists. Getting great results from safelists requires being able to answer these questions: How do you handle the flood of ads you get from safelists? What is the best way to get your ads in front of safelist users? When you send ads to safelists, how can you make sure your ads are getting sent? How do you create safelist subject lines and ads that get a high response? How can you analyze your safelist marketing to learn exactly what is working and what needs improvement? Why do safelist marketers need their own website and how do you set one up quickly, easily, and affordably? Where do safelist users want to spend their money? What makes a safelist user respond to your ad? Why do safelist marketers need an email list and how do you create one quickly, easily, and affordably? How do use your own safelist email list to generate the most profit?

You may already know the answer to some of these questions, but it is important that you know that answer to all of them if you want to make serious money with safelists!

By subscribing to Safelist Training 101 you can take a big step in the right direction.
