Do you find yourself looking for a way to make some extra money? How about creating a website on something that everyone includes in their life, Music? The opportunities are endless and what's great about it is that you can make money on it while you're eating sleeping or just sitting around watching TV.

Don't get me wrong, it is a lot of work in the beginning to get everything started. Once you get your website built the way you want it though, all that is left is maintaining it to keep it at tip top shape. From there you'll be making money off of it 24/7. So, how do you get started and how do you make money off of it you may be wondering?

To start off you need to purchase a domain name, which is your website URL. You can do this at GoDaddy.com for a cheap price of \$9.20 per year. Now you have your website name, the next step is to pick a host for your website. This is where you will build your website. You can do this at GoDaddy.com starting at \$3.95 per month, or choose to go to another hosting company as there are many out there.

From there you are set to build your website, now how do you begin making money off of it?

There are many ways to make money off of your website. One way is to join affiliate programs through companies around the

How to Make Money on a Music Website through Affiliate Programs?

world. How an affiliate program works is you join under that company and refer people through your website to their website. Then, as people go to the companies website through yours, whatever the person buy's you get a certain amount of money off of their purchase.

The amount made varies from company to company and it even varies among the different products sold. The big name companies you'll often make less money off of, such as Best Buy and Circuit City you'll make approximately 3–7% on all sales. Smaller companies some times offer more through their affiliate programs, but people sometimes will opt to go to the well known

companies instead.

For a music website you'll obviously want to join affiliate programs dealing with entertainment of some sort. Bestbuy.com and CircuitCity.com are good ones to join, but can be difficult to get into when you're just starting out. One good one can be found at:

<http://www.best-mp3-music-downloads.com/buy.html>

Clickbank.com is an affiliate network that is extremely good to join as you instantly gain access to you choice of over 10,000 digital products to sell on your website. There are nine categories associated with clickbank.com, but categories to focus on with a music website through clickbank.com would be fun and entertainment and sports and recreation.

Where you find the registration form for the affiliate programs is on the companies' homepage, and it is usually listed on the bottom of their homepage as affiliate program. When doing a music website you don't have to just stick with music affiliate programs either. You can focus on entertainment as a whole that way you can join affiliate programs for games, movies, posters and more.

Another way you can make money through affiliate programs is two-tier programs. Two-tier programs are programs that you make money off of people signing up for the affiliate program through you. Not all affiliate programs offer two-tier programs, but they are out there and signing up to affiliate programs with two-tier programs is to your benefit. A few entertainment two-tier programs that I have joined include;

The best thing with affiliate programs is that they are free. You make money off of selling companies' products and it doesn't cost you a thing to register under the company. Another bonus to affiliate programs is that there is no limit as to how many you are allowed to join and put on your website. The sky is the limit with affiliate programs and money can be made 24/7 on your music website today at the cost of nothing.

Earning With Affiliate Program

By Mohd Zulfaezal Che Azemin

You've probably heard of affiliate programs. Companies use affiliate programs to sell their products. The most common way for making money online with affiliate programs is through posting a link on your website. When a customer clicks on that link and buys the product, you earn a commission.

There are many advantages to making money online with affiliate programs. Startup costs are minimal. The only money you spend is to promote the product, whether through a website or other means. You don't actually sell the product, so you don't spend time shipping the products or money to buy them at wholesale prices, hoping to sell them later. Another advantage is that you don't have to worry about unsatisfied customers returning the product to you.

A good way to start making money online with affiliate programs is to find a subject you are interested in and start a website. After the website is up, find companies that sell this product and register to be an affiliate. They will give you some code to paste in your website. You can use text codes or pictures, but text code seems to be the most effective for converting to sales.

Look at websites in your area of interest. For example, if you are interested in music, look at sites devoted to your favorite musicians. Study them to see how they place ads. Notice your responses to those ads. Some are annoying, but others will make you want to click through. Learn from this and place ads similar to those that interested you.

Starting a website devoted to something you love is rewarding. If you need some extra money, making money online with affiliate programs can be a useful addition to something you already enjoy.

To find the best affiliate programs on the net so you can work at home visit:
