It is a normal thing for human mind is to get confused about different things in life. Here we concentrate on the confusion between `I Can' and I Can't thinking. But first of all we must know why this confusion begins at all. It begins because most of us creates a painful mental experience, without experiencing it in reality , by deviated imagination or self talk. When imagination or self–talk is negative, disabling and weakening the results in the beginning of "I can't" belief, which generates feeling of hopelessness and helplessness.

The "I can't" thinking is self destructive and commonly held by most of us. So before you say "I can't" Say: "I'll try and then I'll give my level best." And Now the question arises "How to do so ?" well, By planning and taking action now think rationally.

* – By taking action - Taking Action only can remove your unnatural mental and physical drowsiness and removes your fears. Action will bring results and results will generate confidence, experience and skills ; and it will improve your performance and attitude.

So once you have decided to change your belief form "I can't" to" I Can " remember : never fears shadows; they simply means that there is a light shining somewhere nearby. Also keep in mind that : Far out in the world , we find success begins with fellow's will, it's all in the mind.

Life's battles don't always favors to the stronger or faster, but sooner or letter the man

Pls read my article "Art Of Criticism" and add one more tact to your attitude.
