I saw a(n) UFO!

By K.A.Cassimally

I saw a(n) UFO! by K.A.Cassimally

It all happened at the beach, few months ago. My uncles, my dad and myself were in a conversation, which quite amazingly resulted in talking about Mars. Being the family's astronomy expert, I pointed to the red dot in the sky. My uncles looked up and laughed afterwards.

"Just because we're nuts in astronomy, doesn't mean we are idiots!"

Well they were idiots in this particular case. Mars was truly there; up in the night sky. The second time I tilted my head 75o backwards however, I saw a faint spot of light moving from right to left. I realised that the object must be some gigameters away and yet it was moving extremely fast. Within 15 seconds, it had passed out of sight! I thought that I was the only one who saw the white little dot sprinting but no! Dad had seen it too and this was proof (to me) that I was not `night' dreaming (unless he was too).

I could've written major article about that sighting: UFO sighting in Mauritius. I could've phoned or emailed or faxed (or any other communication tool you know-ed) the CIA, NASA and SETI. But I didn't. Although I believe in extraterrestrial life, I find it tough to have faith in `flying saucers'.

Nevertheless, I connected to the internet (my bill usually approach the \$37 mark per month) and searched for UFO on Google.mu. I came up with different results namely an article entitled `The UFO Phenomenon'. It is in this article that I learnt what exactly was a UFO besides being an acronym for Unidentified Flying Object. But how do we know that what we have just seen is a UFO?

`An Unidentified Flying Object is anything seen in air or briefly on the ground that looks like an unfamiliar object and still cannot be identified after the report has been studied by scientifically qualified persons.'

Searching for the UFO's definition was the first step in checking whether that white dot I saw was really a UFO. The second step was to actually examine the components of the definition and ask myself the following questions:

I saw a(n) UFO!

·A UFO is anything seen in air or briefly on the ground that looks like an unfamiliar object...

Was that thing I saw familiar? No, so till there that white little dot is a UFO!

...and still cannot be identified after the report has been studied by scientifically qualified persons

Well I didn't phone anybody qualified in science because... I knew that that thing I saw up in the sky must've been a satellite from the quasi-start. No UFO then.

But is it really important to prove whether UFOs exist or not? I don't think so. Of course if a true UFO is discovered, this would mean that intelligent life does exist elsewhere but do you really think we will

accept that fact? Or will the military decide to bombard the 'flying saucer'?

Well it's fortunate that I didn't phone the CIA, NASA or SETI . Because I would have received some severe cranial injuries due to the broomstick assaults!

Sales From The Crypt

By David Riewe

In today's contemporary society, where everything can be done already over the Net, online shopping is one lucrative activity for the seller and convenience for the buyer.

This is where eBay comes in the limelight. Every online shoppers and online traders can benefit a lot in eBay. But because of its wide diversity, things being sold on eBay had increased to amore wider, broader, and weirder.

Yes! With the wide access and convenience eBay gives to its members, there were reports that even the weirdest things were auctioned and even sold on eBay.

Here are some of them:

1. Ghost in a Jar

There was an actual report about an item, dubbed as a "ghost in a jar", being sold on eBay. The seller narrated in his item description how he got the jars (there were two, actually). The seller claimed that the remaining jar contains some "black thing" based on what happened to the other jar after it fell to the ground and emitted some sort of black smoke.

I saw a(n) UFO!

The auctioned placed 60 bids during the listing and had reached \$90 million. Though, there are no concrete reports as to whether the sale was really closed or who got the item in that amount.

2. Vampire killing kit

This refers to a kit suitable for some "vampire hunters". This kit includes an ebony wood stake, a crossbow with four silver-tipped arrows, a variety of surgical instruments, and a large bottle of holy water.

3. UFO Detector

This is a modified magnetometer manufactured by a Brazilian company. It was said on the auction that this item can actually detect an approaching UFO or can spot an UFO activity.

4. Russian Test space Shuttle

It's a spacecraft built by a Russian company. The actual reserve price for this item is \$2 million but was auctioned and bid on eBay with only a small percentage from its actual selling price.

5. Serial Killer's Fingernails

This refers to the fingernails of a certain Roy Norris who sailed to Southern California, in 1979, for a killing binge that murdered five people. He was with a certain Lawrence Bittaker.

These fingernails are placed at the back of a Christmas card with Norris' note, signature, and black thumbprint.

These are just a few of the weirdest things that a buyer can get on eBay. In fact, there are thousand others lurking in eBay and are waiting for some eager and gullible bidders.
