Remember when you were in school, and had to cram
for a test? 'All that material!' 'How am I ever
going to learn it all'?

That may be a classic case of "overload", or so
it seemed at the time.

Back then, we HAD to "learn it all", right then
and there. We had no choice, if we wanted to pass.

Running an online business, though, we do have
a choice.

Maybe a common problem with many people, when they
decide to start an online business, is that they try to
learn it all FIRST, before they start their business.

If you try to do that, you may find yourself with SO much
information, advice, and plans, that you just might become
'bogged down'.

It can happen!

One guru tells you one way to "do it", and someone else
tells you something entirely different. One ebook says one

thing, another ebook says something else.

Part of the problem is that everyone has their own method of doing business online. Even those telling you 'how' to make money online, may not be actually making money themselves.

So, what's a person to do...?

START NOW! START WITH WHAT YOU ALREADY KNOW !

Get your own domain name! You want others to **KNOW**

that you're a business person.

Learn to make a web site. Doesn't have to be a **BIG** site; one page is a good start. Then gradually add to it.

Making your own web site is not as difficult as it may seem. Get a good web site program and **GO TO WORK ON IT.**

Find at least **ONE** good program to sell, **AND SELL IT!** There are many good programs all over the Internet, so what are you waiting for? (But, make sure it's something that will be of value to, and benefit your visitors.)

Already have an idea for an online business? Great! Then do something with it **NOW!** Not next week.

What are you waiting for?
