**It Is Not A Science It's A System**

**It Is Not A Science It's A System by Daniel Kozak**

Marketing on the Internet has been through it I tell it you.  
Gurus who reveal a new secret each month each have mystified  
it each time extracting more and more money from the everyday  
marketers pockets who soon discover that the secret was not  
such a big secret after all.

I have seen people do some strange things and call it marketing  
during my years on the Internet.  
There seems to be some idea that making money on the net belongs  
to a selective few who have discovered the secret formula or science?

I for one disagree with this notion and I will layout several  
reasons why my assertion is that marketing is not a science,  
but yet a system is the key to success online.

While I am on the subject of a system let me say not all systems  
are created equal and many are very unequal in their premise.  
There are also some myths I will try to debunk while I have  
you here if you don't mind. :)

I did it all wrong!....and still made money!

When I started my first website the only reason I got it was to  
produce forwarding links to affiliate pages so if you would have  
ever visited my home page you would say, wow this guy didn't even  
finish his homepage.

But, I was making money!

## It Is Not A Science It's A System

I have just recently started really paying attention to starting a newsletter type mailing. I did very little if any follow-up yet I was giving away a ton of valuable info at no cost. My list was swelling from giving always, but due to my disorganized habits I rarely emailed them on a consistent basis.

But, I was making money!

Ok I think you get the point I was doing it all wrong and still made money so how was it happening. I had a system not a good one but I had one.

My unorganized system did have a downfall though it was rarely duplicated and without duplication in network marketing your profits have a short life span.

I found it! I found it!

One day I stumbled across a very successful network marketer and really started to soak in the information he was putting out. He was just as disorganized and excitable as I was, but what he had that I did not was a system that could easily be duplicated by all who worked with him.

Now I was not interested in the products he sold and the amount of money it would take to work with him in his system but I loved the system.

My products of choice have always been of a tool or resource nature that all marketers need no matter what their primary business happened to be.

The old pick and shovel guy that is me! :)

His system rocked!

This system gave the site visitor some intriguing information that beckoned them to come inside to see more then once inside an array of opportunities and insight was at the visitor's fingertips.

All follow-ups was master minded by the network marketer who had a neat way with words that brought out the belief needed to succeed but, the emails bore the links to the opportunity of the person whose page I signed up under.

## It Is Not A Science It's A System

The system duplicated the site for everyone and then was customized with their name on it and all the links inside the site and in emails to their fre\*e signups had their links in them. POWERFUL!

Powerful but, expensive as it would have taken \$150 to \$200 per month to work with his system.

My Quest Began.

I knew the system was great, but how could I recreate it but use my type businesses in the system. I also wanted to make the businesses so affordable that anyone who was serious about making money on the net could use it.

I will cut my journey short to say finally my best friend whom I have never met made my dream system come true.

Through many trials and errors finally ISO Profit Center was born.

## **Science Fiction DVD**

**By David Evermon**

The world of Science fiction is a vast one. Millions of fans enjoy their science fiction collection for many different reasons. For example, a science fiction DVD may have tremendous monetary value, sentimental value, or just the value of enjoyment. Whatever the reasons science fiction fans have raised the popularity of owning their own science fiction DVD.

One extremely popular reason of watching science fiction DVD's is that they can be watched over and over again. Some of your favorite television show episodes have now arrived on DVD, which means you can watch your favorite show as many times as you want to, commercial free. Furthermore, fans of science fiction take great pride in owning every science fiction DVD available in a certain category, movie, of a specific actor, or of a television series. They make for great bragging rights when you attend your next sci-fi convention.

What is great about a science fiction collection is that it can be steadily built, with very little monetary investment for the most part. Now do not get me wrong, some specific science fiction DVD may cost you quite a bit of cash. However, for the most part, you can build an extremely vast collection without much of a dent in your wallet. For example, if you are looking to build your science fiction collection or start one for the first time, you could consider looking online to find a cheap science fiction DVD.

There are many places you can look, for example, there are complete websites available to you on the internet that caters only to science fiction fans and movies. Furthermore, you can save even more money by visiting auction sites such as eBay or find a wholesale distributor to save money on a science fiction DVD. Some other places you may be able to save big money on your science fiction collection is in general merchandise stores such as Wal-Mart or K-Mart.

You do have the option of shopping at specialize movie stores; however, you should expect to pay a little more money at these places. You could also find a cheap science fiction DVD in a video rental store. It may be a previously viewed movie, but it will still be cheaper than buying elsewhere.

Many fans looking to buy a science fiction DVD, may not even watch the DVD at all. It may be a special part of their collection. After all, many things are worth more when still in the original packaging, in mint condition, and has never been opened or used. This gives the science fiction more trading and selling power. Trading a science fiction DVD is a popular activity in the collecting world. Perhaps one person has a real desire to have a DVD that is in your science fiction collection, while they may have something of equal value that you have been looking so hard for. This again, gives you trading power, especially if the science fiction DVD is in good to mint condition.
