**Jet Ski Engine Maintenance Tips**

**By Low Jeremy**

Jet skis are personal watercrafts that will sure leave you hurling for more in open waters. However,

to be able to make the most out from them (besides their tag prices are so high that you must really get the deal from your precious vehicle), you have to know what keeps it in good working condition.

Other jet ski parts aside, jet ski engines are probably the most important part of the whole machine. It drives the watercraft, it gives the power. Depending on the condition, they provide the performance and create the envying waves. Well, in fact jet ski engines are the ones that will keep the machine running.

In fact, when your buying for a jet ski especially those that are sold second hand, the looks wont say it all. It is always the engine that would spell the difference. In fact, the more the scratches while the engine is working on its optimum power, the better the deal. The engine therefore, gives the life for the vehicle.

The whole PWC is useless when it's not working right? Well, maintenance for your jet ski engine does not entail demanding routines. As a sample, it would be good to note that the engine, for it to work properly must always be supplied with enough oil. (that isn't hard right?)

Oil provides the lubrication. This is vital since once the jet ski engine lacks oil, fusing of parts would be possible.

Another thing, flush water from your engine regularly. Lake water may do but algae and dirt normally cause buildup in the engine parts which may eventually cause the decline in performance of the machine. If you are using your jet ski in salt water however, you have to assure to it that salt water is flushed before storing it.

Salt, once it builds up can actually cause you serious problems. These are quite hard to remove and you have no other option but to painstakingly remove them by means other than using hot water (one of the most effective medium for removing salt deposits. After all, you can never use hot water in cleaning a cooling system.

## Jet Ski Engine Maintenance Tips

You need also to have a close watch on the impeller. Minerals, dirt, weeds and algae can all get deposited in the impeller which in the end, will drop down the performing capacity of your jet ski. Remember to clear these once you get out from water.

Other than these jet ski engine tips, please check for the specific engine maintenance as stipulated in your PWC manual.

### **Getting Your Used Jet Ski Ready For Sale**

#### **By Low Jeremy**

Whether you want your used jet ski to be auctioned on Ebay or special jet ski selling sites, be listed on the yellow pages or newspapers, or be posted somewhere else, there is one common thing you should do: get it ready for the next owner.

Since selling a used jet ski is like selling a used car, knowing how to make your jet ski look flashy on the outside and perform superbly on waters is your task. So to better give you the idea on how to get your used jet ski ready for sale, here are the things you can do:

- Remove all the dents and scratches

There are a number of commercially available compounds that will effectively remove all the impurities of the exterior of your jet ski. These can be purchased on hardware store or over the internet. A couple of bucks to spend on these items will certainly increase the value of your used jet ski at the same time, would attract more potential buyers. The idea is this: buyers would want to buy used jet ski that looks brand new. So give them what they want.

- Remove rusts and any sign of corrosion

After solving the exterior, move on the more delicate and major problem to solve: you must now clear your jet ski from rusts and any sign of corrosion. Again, there are several commercially available rust removal compounds that can be purchased on hardware stores and the internet. It should be noted that most jet skis are made from rustproof material but just a preventive measure, make sure you check and remove all these.

- Research on the actual price of your jet ski

There are sites that provide information on the actual market value of your jet ski. But if you cannot find one, you can check out the site that sell used jet ski. You can base your price from them.

·Have the papers ready.

If you happen to have some receipts for your purchase of you jet ski still kept, you can use them and present to them to the buyer. In this way, your buyer will get informed in the different modifications, repairs, and replacements made on the jet ski.

Finally, you should remember that keeping your jet ski in its perfect shape from day one would lessen the trouble of having it fixed during when the time comes when you have to sell it.
