Legal MP3 Downloading

2005 legal stress is more upon downloading music from the net. risk can be made to surfers who will not use legal download share software.

As you know downloading music today is involves at great risk, you can get fine by your goverment by use of ilegal donwload mp3 software from net. this is violation of copyright and if you succsed doing so do you know how much damage it can cause your computer? I have heard very shocking things from my best friend on the fines you can get for download mp3 music, movies, games..

WWW.EBEY.ORG has collected for you the top brand names of the 100% legal download mp3 music, dvd, games, softwares. If everyone started downloading legal music instead of violating copyright with the file sharing programs, we would make short work of the RIAA.The RIAA would also have no cause to complain – these music downloads do not infringe copyright because the artists give you permission to download them. Especially when you want full-length recordings. How I miss ebay.org when it was much easier to find!

Now, RIAA and NARAS, as well as most of the music industry, are arguing that free downloads hurt sales. (More than hurt – they're saying it's destroying the industry.) "Analysts report that just one of the many peer-to-peer systems in operation is responsible for over 1.8 billion unauthorized downloads per month". (Hilary B. Rosen letter to the Honorable Rick Boucher, Congressman, February 28, 2002)

Realistically, why do most people download music? To hear new music, or records that have been deleted and are no longer available for purchase. Just avoid downloading music from all kinds of free software who will cause you trouble!

2005 brings you 100% legal software with unlimited free downloads of mp3, for one year subscription at very low cost. Stay legal and enjoy music!

How To Control The Music Download Madness

By Charles Cruz

After following the trend of users coming on to the internet to download movies, many resources started to come out offering you the latests downloads. At the very beginning this was great for most users.

After a while, people started to take advantage of this. They started adding pop ups, illegal spy software, among many other things to their sites. You downloaded an mp3 file and you got the file, but with it you had a shiny new browser window that told you to buy viagra everytime you surfed the web.

Fortunately, other resources came out. Legal Resources. Places were you can come inside and download music in a safe way, in a way you can trust.

These are cost effective, and if you compare it to the damage that could be caused by downloading the files from an illegal source, then the legal sources will outweigh their value by tenfold.

When you're downloading for and Mp3 music file online, there are a few things you will want to look for:

1) The quality of the Mp3. File quality can range anywhere from 20 kbps which is blurry quality to 320 kbps which is basically CD quality. You should aim for downloading music files that are above 128 kbps. Anything below that will have a trashy background that will not sound great when you burn it onto a CD.

2) You internet speed must be in a good shape. Sometimes it's necessary to restart your computer to get it back to optimum speed before attempting to download any mp3 file. You'll want anything over 3 kb/s to get the song in under 10 minutes.

3) Check you computer to make sure you have enough space on the drive you're downloading your file. There's nothing more annoying than getting to 75 percent of the download only to find out that you didn't have enough room in your C: Drive. Nowadays with our hard drive's spaces growing this is more unusual but it's best to make sure before you start.

4) Make sure you don't make illegal copies of the music you're downloading. The best way to download music is to use them as samples for a music album. You download a music file, see if you like it, and if you do, you go ahead and buy the record. If you don't then sample on to the next band. This way we keep the music industry going and it's an all round win win situation.

All and all, downloading music is a great experience and you can even learn about new bands that you'll want to go to the concert or buy the album later. Just make sure you do it from a legal source and keep your copies to yourself.

Charles Cruz CEO of Download Music Central (

) Educating people on how to properly

download movies online.
