Menopause, Andropause And Other Hormone Imbalances
Impair Healthy Healing In People Over The Age Of 30!

Lifeless

By Carol Dee Meeks

Lifeless by Carol Dee Meeks

Lifeless

A human body without a soul,
and faith without works is dead, grows cold.

Our faith exhibits to all brothers
love and compassion needs of others.

Expedient, is the action verb.
Ingredient, in food as the herb.

Our faith exhibits to all brothers
love and compassion needs of others.

Perhaps those less fortunate that we
or those in bondage wanting to be free
escape our minds, we promise prayer
then turn and run, we leave them there.

Our faith exhibits to all brothers
love and compassion needs of others.

We can come alive, give God glory
and share with all those His magnificent story.

It'll help increase the quality of their life.
It'll help increase the quality of our life.

Then we won't become as the Dead Sea
without outlet, stagnate and dirty.

I am recently retired and love the new found time I have to pen my heart's desires. I hope to exalt my
Saviour with my writings.

Does Money Make Money?

By Colin Dunbar

Does Money Make Money?

by: **Colin Dunbar**

If it is your goal to accumulate wealth, believing the fallacy that money makes money, will hinder your
progress to no end. This belief stifles many to a life of failure, and misery.

The goal setting theory of motivation means that you need to be positive – and realistic – to be able to
reach your goal, especially if that goal is to make money.

How many times do we hear that "money makes money." Money can make money just as easily as
Ferrari can win the Grand Prix without Schumaker in the driver's seat.

"Ferrari is the Grand Prix world champion." Do we say that? "Microsoft invented Windows." Do we
say that? Or do we say, "Schumaker is the world champion." And "Gates invented Windows."? Of
course we give credit to the person, or people. And that's because that is the reality.

Money is an innate, lifeless thing.

To illustrate...

Let's say we want to make our money grow, then we place a \$100 note in a tin and bury it, and a year
later we return and dig it up. How much money will there be? Only our \$100 note we placed in the tin.
There is no way, on God's green earth that there can be one cent more than the original \$100.

People make money! And people lose money!

Certainly, money can earn interest, but the person (or rather the person's intelligence) is required to
invest the money to earn that interest. In this regard, a person can make a bad investment, and not
earn as much interest, or can lose money.

On the other side of the coin (no pun intended), a person can indulge in a business venture, and this
way make money. Or lose it!

Whichever route is taken, it is the intelligence of the PERSON that either makes money, or makes
more money. This is the way it has always worked, and always will.

Lifeless

Even in the event where someone has a big windfall, like winning the lottery, this money can be squandered, or made to multiply. Whichever it is, it is up to the person, to either invest wisely, or to spend endlessly. The history books are full of tales where enormous fortunes were won, and then lost.

Therefore, if it is your goal to make money, don't fall into the trap of believing that "money makes money"; it is a lifeless object, that cannot possible multiply without the intelligence of a human being. Rather...

Make it your goal to...

... learn about money, and how to invest and use it to multiply.

Colin Dunbar has researched all aspects of goal setting for more than 25 years. He is now making his system available to everyone. Comprehensive manual with worksheets PLUS companion software.
