## Locating The Best Place For Song Downloads

By Andy West

What is it about song downloads that makes it so much fun to search for them? Is it because

virtually every song imaginable is online in some form, typically through music stores, and record company websites? Or is it the fun of sharing music with friends, and family? Whatever the reason, song downloads are as popular now as they have ever been. Finding song downloads can be a difficult task if one does not know where to look. Further, song downloads can cost different amounts at different sites. Just like shopping for your favorite grocery item at the cheapest store possible, you should look for song downloads at the cheapest price online possible.

One place to check out all the latest song downloads is emusic, the place for independent, and rare songs. Similar to itunes, emusic offers it's customers a special software application that helps them download songs fast. The best part of emusic is the price per download. Typically a music download will cost anywhere from 75 cents to 1 dollar. At emusic the cost is only 25 cents, and some are even less than that.

Another great place to download music is itunes. What might be the most popular song download site on the net today, itunes is a true winner. Virtually any music that is available for download on the internet today is available on itunes. The site offers users an easy to use interface for downloading music, and makes the art of getting your favorite song downloads as easy as can be.

Whatever site you choose to use, it is important to keep in mind that price is an issue. Many companies offer free trails, or free song downloads in a move to entice users to join their service. It is extremely important to compare these services and prices before signing on for any given program. Some services are priced by category, others are priced by year, and yet others are priced in bulk. This makes for a confusing, and sometimes tedious process of finding the best deal.

One way to find the best deal is to utilize review oriented websites, like Review Place. When looking for song downloads sites, Review Place offers unbiased customer reviews of the best websites and services on the net today. Combining the ease of use with the valuable customer ratings that it provides, Review Place makes choosing the right site for song downloads as easy as pie.

## Locating The Best Place For Song Downloads

The key to getting the best song downloads is finding a service that is right for you. Many people enjoy the newest hits, or the biggest names, and thus want a service that will provide such a service. Others are more interested in value, and finding undiscovered acts. For them a service that specializes in this would make more sense. So, it is important to research exactly what you are looking for in terms of song downloads, and then try to review the various services offered by all companies that fit your criteria.

It is also important to research what it is that you can do with the songs you download. Some song downloads are protected, and only for use on your computer for as long as you pay your monthly service fee. Others are instantly available for you to keep, burn to CD, transfer to a portable device, and so forth. Whatever the method that works for you when it comes to song downloads research will certainly pay dividends in the end.

## **How to Download Music From The Internet**

**By Gary Hendricks**

Most of you have probably heard of the RIAA's quest to crush online music piracy. The illegal sharing of copyrighted songs via the MP3 format over the Internet costs the music industry billions of dollars. This is conventionally done using illegal file sharing programs like KaZaa and iMesh. This article explores the legal ways to download and enjoy music from the Internet.

### Method 1: Check out Free Music Sites

There are many free music websites which provide free music downloads. These are not the websites of your music pirates – they are totally legal. Don't expect to find full albums to download, particularly if the song is from a famous artist (only music pirate websites allow full album downloads). You'll only find a few "teasers" intended to make you want to buy the artists' CD. Independent, less well-known artists are an exception – many of them will let you down their complete song catalog to promote themselves.

Here are a few of the free music websites which I recommend: AMPCAST.com Amazon.com Digital Music Downloads RollingStone.com ElectronicScene.com The Internet Underground Music Archive

### Method 2: Buy Music Online

## Locating The Best Place For Song Downloads

An increasingly popular way to find and download music online is to head for legal online music services. The most popular of these is the Apples iTune service. Currently it provides over 400,000 songs from all five major labels. Each song is available for a standard price of 99 cents each. Here are the best online music services I've come across: EMusic.com iTunes MusicMatch Downloads Napster 2.0 Rhapsody Weblisten.com

### Conclusion

It is very tempting to use KaZaa and other file sharing programs to download music – but please don't. If you wrote a song and sold a CD, would you be happy to see millions of people distributing that song for free? No. You don't have to break the law to find and download free MP3 music. There are many websites out there offering free music – you just need to find them.
