Looking for An Exciting New Internet Business: Look at Prosperity Automated System

By Michael Brooke

Looking for a Unique New Internet Money Maker? : Look at Prosperity Automated System.

There have been big technological breakthroughs on the operations side of the Internet, thanks largely to Google's innovations and other search engines scramble to keep up with it. Internet businesses on the other hand are still developed along a few narrowly defined protocols with the odd tweak here and there, but there have been no major breakthroughs, that is until Prosperity Automated System (PAS) appeared on the scene about a year ago.

PAS really does have something new to offer. While the writer does not pretend to understand the technology behind PAS, as a user he knows what it does and he loves it! PAS takes all the boring, grunt work out of Internet sales and marketing which up to now has consumed hours a day of our time: getting reliable leads, phoning them, following up etc. You know the routine. It's mind-numbing, and only the most dedicated and the most numb-minded stick to it.

PAS is changing all that. PAS identifies likely prospects right from the search engines, as well as through extensive offline marketing, and after weeding out the tire kickers, only pre-qualified prospects finally reach your website ready to buy your product whether it be health food or sports equipment. In addition, the prospects also have an opportunity to buy and then resell the System itself and earn \$3,000 USD each time. You therefore can have two or more two streams of income emerging from your website. While you have to answer questions on your own products, you don't have to do anything to market PAS if you don't want to. If there are any questions or prospect concerns, PAS's experienced Team Leaders address them on your behalf.

PAS is the ideal business for different groups of people. ·

+ As PAS is truly a passive income opportunity, you don't have to do anything to earn your money if you don't want except purchase your System (by license agreement, like most software) and wait for the money to be posted to your bank account.

+However, if you want to take a more active role and have some extra marketing funds, you can do your own advertising and market more aggressively for yourself and your team. In this way you are

Looking for An Exciting New Internet Business: Look at Prosperity Automated System

likely to attract more prospects to your website and sell more product. PAS is a win/win/win opportunity for all. No one is left behind.

PAS is arguably the only company on the Internet that offers this degree of automation. Its future potential is enormous for those who are patient and don't expect to get rich overnight. Right now there are only a few hundred associates in this young company so it is a great time to join. But take off it will when the Doubting Thomas's and the skeptics finally admit to its merits and make a mad scramble to get on board. But when the quotas are reached, that's it.

Prosperity Automated System is so subtle, so innovative and so clever that it has gone almost unnoticed except for the 400 smart people who have already bought into it, most of whom are laughing all the way to the bank! I think this low key approach is done intentionally. The owner and the

associates want the company to grow slowly and methodically so they can resolve all the developmental issues before the surge to join takes off.

Be assured this company is not for the frenetic, Anthony Robbins, gung-ho types. If you want this go elsewhere. Join one of the many high pressure Internet companies developed for the benefit of its owners and the early opt-ins. Here you will have lots of opportunity to engage in countless conference calls, make 100s of phone calls a week, and be pressured daily to buy more and more product. Not so with PAS! It's very simple, very straight forward, and very forthright and honest. It takes its lead from its owner, Bill Osterhout.

I have found most the people I have associated with in PAS to be, in a word, "mature". It proves a point made many times. Employees or associates assume the temperament of their Boss if he or she is a strong personality. If he or she is a mature, positive, confident, low-key type, somehow this rubs off on the others. In my experience this is exactly the situation with PAS where the President Bill Osterhout, is just such a person. Associates respect him. Associates trust him. While Bill calls the shots—as he owns the company—he is smart enough to know he doesn't have all the answers. Bill will always listen to you regardless of how way out your idea may be and the brighter and more successful associates are listened to with particular care. He listens quietly, and dispenses his measured response wisely.

. If you are a

mature, patient person, have some experience in life, and some money to invest, you owe it to yourself and your family to visit this site. If you are the type of person I have described, I know you will really like what you see.

Hate To Sell? Design Your Business So You Don't Have To

By Terry Telford

Owning your own business can have tremendous benefits. You can experience the joy of being your own boss, setting your own hours, working from home, and earning just as much as you want.

But with all that freedom comes a few challenges. If you've already worked a home-based business, you know what they are. A dislike for selling tops the list for millions who start their own business.

"I really believe in my product," Maria says. "But I hate trying to sell it to complete strangers. Often they aren't interested and the rejection makes me want to give up on the business."

These days it isn't necessary to like to sell or even know how to sell. Automated systems are taking over all the selling and prospecting duties.

Here's how this highly automated system works. Advanced search engine marketing automatically pulls thousands of prospects to state of the art web sites. Keep in mind, these are TARGETED prospects. They aren't just anybody, but are mostly those who are actively interested in your product or service.

Then a pro sales team talks with each prospect. This keeps YOU from having to talk on the phone with customers. The sales team answers all the prospect's questions and quickly finds out if the prospect is qualified to buy your product or service.

Then the prospect, already sold and ready to buy, is delivered to you. You simply get up in the morning and check to see how much you've sold — that's it!

Looking for An Exciting New Internet Business: Look at Prosperity Automated System

But what if you don't already have a product or service? That's no problem. This automated system is so hot that you can simply sell the system to others and earn thousands per week. That's right -- THOUSANDS per week.

With that kind of big money, you may be looking at home-based business in a new light. Use your automated home business to augment your income, pay off bills, expand your budget to afford nice cars or a better place to live, even retire early.

Or make your home business your full-time career. Think of all the options you'll have in life when you only work a few hours to a few minutes per day. You can get up when you like, get dressed when you like, never have to commute, and spend just as much time as you want with those you love.

Clearly, automation and out-sourced selling is turning home-based business into the new "dream job." Get on board while this exciting trend is hot.

Terry Telford is president of Bridgeport Communications. See his completely automated home business system at
